Ahéhéé!

Ferlin Clark, President
Naat’iání Diné Bidziilgo Wódahti Óltá’ alágíí’ yá sííj.
Welcome and thank you for choosing Diné College, the nation’s first and largest tribal college. It is an exciting time at Diné College, as 2008 will mark our 40th anniversary in celebration of preparing “warriors” in the fields of education, health, public safety, business, culture, and leadership.

We are committed to helping you succeed. Diné College offers a diverse list of courses either for personal enjoyment or towards fulfillment of academic degree requirements. Whether it is math, science, business, Diné language, culture or history, our accreditation by the North Central Association’s Higher Learning Commission for Colleges and Universities ensures you of a quality and credible education at an affordable price.

Since our inception in 1968, Diné College has worked to create the most appropriate atmosphere to foster learning. Our guiding philosophy of S’á’áh Naaghai Bi’eh Hózhóon provides and supports life-long learning. Further contributing to a well-balanced learning environment are our four principles of Nitsahákees (Thinking), Nahatà (Planning), Iinà (Living), and Siihasin (Assurance).

As the original tribal college, our dedicated faculty and staff are committed to meeting our charter and mission by offering a meaningful and challenging educational experience to our students.

Again, I welcome you to Diné College. I invite you to take a look at our catalog of classes and I encourage you to make Diné College a stepping stone in your educational journey towards fulfilling your life goals.

Diné College at a Glance

Mission Statement

Diné College is a public institution of higher education chartered by the Navajo Nation. Our mission is to apply the Sa'/g261h Naagháí Bik'eh Hózhóón principles to advance quality student learning:

- Through Nitsáhákees (Thinking), Nahat’á (Planning), Iiná (Living), and Siihasin (Assurance).
- In study of the Diné language, history, and culture.
- In preparation for further studies and employment in a multi-cultural and technological world.
- In fostering social responsibility, community service and scholarly research that contribute to the social, economic and cultural well being of the Navajo Nation.

Strategies to Implement the Mission

- Two-year transfer programs
- Diné Studies and Language
- Developmental Studies
- Research projects and consultant services
- On-site outreach programs
- Articulation with other institutions
- Center for Diné Teacher Education

Educational Philosophy

The educational philosophy of Diné College is Sa’ah Naaghái Bik’eh Hózhóón, the Diné traditional living system, which places human life in harmony with the natural world and the universe. The philosophy provides principles both for protection from the imperfections in life and for the development of well-being.

History

Diné College was established in 1968 as the first tribally-controlled community college in the United States. In creating an institution of higher education, the Navajo Nation sought to encourage Navajo youth to become contributing members of the Navajo Nation and the world society. Under the direction of an eight-member Board of Regents confirmed by the Government Services Committee of the Navajo Nation Council, the College serves residents of the 26,000 square mile Navajo Nation, which spans the states of Arizona, New Mexico, and Utah. As a postsecondary educational institution, Diné College awards associate degrees and certificates in areas important to the economic and social development of the Navajo Nation.

Academic Assessment

Diné College has a comprehensive academic assessment program to measure student learning. Its purpose is to specify measurable student learning outcomes in accordance with the college mission, assess student learning in terms of the outcomes, and use the results to improve academic programs. Students are required to participate in assessment activities periodically during their studies at Diné College. Data are collected when students enter the College, and additional data may be gathered each semester and prior to graduation. Assessment activities may include surveys, essays, tests, and portfolios. Student responses are confidential and anonymous and do not effect grades in any way.
Accreditation

Diné College is accredited by the Higher Learning Commission of the North Central Association of Colleges and Schools; 30 North LaSalle Street, Suite 2400, Chicago, IL 60602-2504; (800) 621-7440; http://www.hlcommission.org. The college holds memberships in the Rocky Mountain, Arizona, New Mexico, Pacific, and American Associations of Collegiate Registrars and Admissions Officers; the American Indian Higher Education Consortium; and the Association of American Junior and Community Colleges.

Drug-Free Campuses and Regional Sites

Zero Tolerance Policy

A drug-free school policy has been adopted by the College and the Navajo Nation in compliance with the Drug-Free Schools and Communities Act Amendments of 1989 (P.L. 101-226). The College is committed to preventing the abuse of alcohol and the illegal use of drugs and alcohol by students and employees. Smoking and the use of smokeless tobacco are also prohibited in College buildings and vehicles.

Family Education Rights and Privacy Act (FERPA)

Social Security or CARS numbers are used for students' identification and records only. The Family Education Rights and Privacy Act of 1974 protect the privacy of such information. The College provides access to specified official records related to the student and an opportunity to change such records if they are inaccurate while providing for the challenge of actual grades received. Only the Registrar's Office and other authorized personnel have access to student files. To insure that their rights are upheld, students are required to file requests for non-disclosure on an annual basis if withholding of directory information is desired. Such requests will be honored for one academic year.

Non-Discrimination Policy

Diné College does not discriminate on the basis of race, ethnicity, religion, national origin, sex, age or disability. The College complies with the Civil Rights Act of 1964, the Title IX of the Education Amendment Act of 1972, Section 503 and 504 of the Rehabilitation Act of 1973, Section 402 of the Vietnam Era Veterans Readjustment Act of 1975, the Age Discrimination in Employment Act of 1967, as amended, and the Navajo Preference in Employment Act. Equal opportunity for employment and admission is extended to all persons.

Disclaimer

Terms, conditions, fees, course offerings, admissions, graduation requirements, college rules and regulations, college calendar and other regulations affecting the student body set forth in this catalog are in accordance with information available at the time of publication. Diné College reserves the right to change these conditions when necessary.
One College Multi-Site System

The main campus of Diné College is located at Tsaile (Tsééhílí), Arizona, the “place where the stream flows into the canyon.” Sites at Window Rock, Chinle, Ganado, Kayenta, and Tuba City serve Arizona residents, while a branch campus at Shiprock and a Site at Crownpoint serves New Mexico residents.

As a multi-campus institution, all sites offer educational programs for transferring to four-year colleges and universities and for entering employment. Developmental Studies is offered at all sites for students who need further preparation for college-level academics. Courses in Navajo language, history, and culture are also available at all sites. Tsaile Campus is unique within the Diné College system in serving both a residential student population and a commuter population. It is also the administrative center for the college. Each of the Sites provides educational opportunities, academic advisement, career counseling, and assistance with application for financial aid.

Designed in the circular, holistic tradition of the Navajo Hogan, the Tsaile Campus reflects the strength of the Navajo culture. Administrative, instructional, residential, recreational, and library facilities are placed in reverence to traditional Navajo beliefs and create an environment for growth and academic success. The Tsaile Campus has eight residential halls.

General Education program courses are offered at all sites and each site offers limited degree programs. The main sources of revenue for the College come from the Bureau of Indian Affairs and from the Navajo Nation. The states of Arizona and New Mexico, plus grants from public and private sources augment Diné College’s revenue.

Admission Policies and Procedures

Admission Requirements
Students seeking admission to the College should obtain an admissions packet from the Office of Records/Admissions at Tsaile or Shiprock Campus, or from any of the Sites. Please submit the following documents:
- A completed Diné College admission application with $20 money order or pay at the Cashier – Tsaile Campus.
- Official Certificate of Indian Blood for all American Indian students.
- Official high school transcript or official test scores of General Education Development (GED).

Denial or Cancellation of Admission
Diné College reserves the right to deny or cancel the admission or registration of any student who has an outstanding debt at the College or whose attendance would not be mutually beneficial to the student or both. Moreover, an admitted student found to have willfully concealed information or made false statements on their application may be subject to penalties pursuant to tribal, state, or federal codes, and will be subject to immediate expulsion.

High School Concurrent Enrollment/Dual Enrollment
Area high school juniors and seniors may be admitted upon submission of a completed and signed High School Concurrent Enrollment Form, which includes parent, high school counselor and principal signatures as well as a high school transcript to enroll in approved courses. When the High School Concurrent Enrollment has been accepted and approved by the appropriate Division Academic Dean, the student is required to take the placement tests as part of the admission process. Payment of tuition, fees and books are the student’s responsibility. New Mexico and Arizona Department of Education may have other guidelines; contact the Admissions Office for further information.

Gifted and talented H.S. students must meet certain requirements, therefore, must make an appointment to meet with the appropriate Division Academic Dean or the Regional Director.

International and Foreign Students
International or foreign students applying for admission must contact the Office of Records and Admissions at (928) 724-6630 for information on the application process and requirements. Diné College does not provide scholarships or financial assistance to international students. Moreover, applicants must submit documentation certifying adequate financial resources for attending the College.

The Financial Aid Office may award an International or Foreign student under certain eligibility requirements for students participating in intercollegiate activities. Obtain a Letter of Intent from the Athletic Director or Coach.

Non-Degree-Seeking Students
Anyone interested in enrolling in a class as a non-degree student must submit an application for admission and the application fee of $20.00. Non-degree seeking students are limited to eight or less credits per semester and must fulfill regular admission requirements upon completion of 12 credits. Transcripts and test scores are not required. Non-degree-seeking students are not eligible for financial aid.

Placement Tests
Diné College requires all new students to take the reading, writing, and math placement tests prior to or during registration. Students are expected to accept the course placement indicated by their tests scores. However, if students feel they should be placed into a higher course, they may challenge the tests before registering for classes.

Exceptions may be made for transfer students who have successfully completed English, math, or reading at another institution upon presentation of an official transcript of previous coursework. The Office of Records and Admissions shall determine the validity of the transfer grade(s). Transfer students who cannot prove previous coursework in English, math, or reading must take the placement tests.
For all students, a passing score on the reading test or evidence of successful completion of the College's series of reading courses is a graduation requirement. (See Reading Proficiency Requirement for Graduation.)

**Re-Admission**
Diné College students who have not attended for two consecutive semesters must apply for readmission by submitting a new admission application.

**Transfer Students Admission**
Students who have attended other accredited colleges or universities prior to attending Diné College are considered transfer students and must submit official transcripts from other colleges/universities attended. Diné College may evaluate and accept a maximum of 40 credit hours below the 300 course level with a grade of “C” or better. Transfer courses will not be included in the student’s Cumulative Grade Point Average (CGPA), and will be shown without designated Diné College equivalents. Transfer credits remain on a student’s permanent transcript.

**Bachelor’s Degree Program**
Students interested in completing an Elementary Education Bachelor’s degree on the Tsaile campus can take their general studies courses fulfilling their Freshman and Sophomore years through Diné College and may transfer to the Center for Diné Teacher Education (ASU) Program.
Registration

Registration is conducted at the Tsaile and Shiprock campuses and at regional sites. A registration fee of $20 is required for all applicants. Students are encouraged to pre-register each semester. During registration, students are assigned an academic advisor to provide guidance on academic programs of study and enrollment. Students are not permitted to attend classes or participate in class activities unless they are officially registered.

Ability-to-Benefit Test
An individual who does not have a high school diploma may qualify for financial aid by passing an “Ability to Benefit” test. The test is available only at the Shiprock Learning Center, (505) 368-3518/3522. The individual must obtain passing scores to qualify for Title IV financial aid funds. For detailed information contact the Financial Aid Office (928) 724-6738 or the Learning Center at the Shiprock campus.

Billing of Tuition and Fees
Billing of tuition and fees occur at the time of registration. Diné College accepts cash, money orders, VISA or Master Card debit and credit cards only. Payments must be made to the Cashier in the Finance Office. The Finance Office also accepts debit or credit payments over the phone. The college does not accept personal checks. Students with a student account balance in excess of $150.00 are not allowed to register. Students must have a zero balance to enroll in courses, obtain official transcripts, diplomas, or certificate of degrees. Unofficial transcripts are free of charge. Students must pay all tuition and fees in full for each semester.

Financial Aid & Scholarships
Non-cash paying students must have a Financial Aid Award Notification to be eligible for a deferment for their tuition and fees and to charge their books at the bookstore at the Tsaile and Shiprock Campuses.

First Year Cohort Program
All students who test into developmental reading and math courses are encouraged to apply for this Cohort Program. If a student would like to complete required developmental classes quickly while participating in service learning projects, the cohort program is the route to go. For more information or to apply for the cohort, contact the Humanities Division at (928) 724-6614 or the Learning Center at (928) 724-6725.

Library Card
All students must obtain a library card which will give them access to services at the college library.

Placement Tests
Diné College requires all new students to take the reading, writing, and math placement tests prior to or during registration. Students are expected to accept the course placement indicated by their tests scores. However, if students feel they should be placed into a higher course, they may challenge the tests before registering for classes.

Student Activity Fee
Students registering at the Shiprock and Tsaile Campuses and at the Tuba City Center are charged a $25.00 student activity fee which is non-refundable.

Warrior ID
All Dine’ College students are entitled to a WarriorID and is highly recommended that the student obtain one as soon as they register. A WarriorID is a login and password that you will use to:
- Access Diné College Computers
- Use your Diné College e-mail account
- Take online classes through Diné College's online learning systems
- Access portions of the Dine’ College website which are restricted to Students, such as your grades and financial information.
General Academic Policies

Academic Appeals
Students placed on academic probation or suspension may appeal to the Academic Standards Committee by filing an appeal with the Registrar. The student has the right to appeal any action affecting their academic status by obtaining the appropriate form from the Registrar’s Office: Appeal of Suspension, Appeal of Probation, Grade Appeal, or General Appeal.

Academic Integrity
Students are responsible for the integrity of their academic work. Examples of academic dishonesty include but are not limited to obtaining unauthorized assistance in any academic work; cheating on a test; plagiarism; quoting without proper credit; modifying any examination, paper, record, report or project without the instructor’s approval for obtaining additional credit or an improved grade; and representing the work of others as one’s own. The instructor may recommend appropriate action to the Academic Standards Committee and the appropriate Division Academic Dean, who makes the final decision. Some of the penalties that may be imposed include: warning (written or oral); reducing the grade for the assignment, test, or project; reducing the grade for the course; assigning a failing grade for the course; dismissing the student from the course and issuing a grade of “W”; academic probation or suspension; expulsion; and recording the decision in the student’s academic record.

Academic Probation
A student who does not maintain a semester based GPA of 2.00 is placed on academic probation during the next semester of regular attendance. Academic probation is not recorded on the student’s transcript. A student may appeal academic probation by obtaining appeal information from the Registrar’s Office.

Academic Standing
Students must maintain a 2.00 cumulative grade point average (CGPA) throughout their program of study. When students receive final grades of A, B, C, D, or F, they are considered credit hours attempted and earned. W, I or IP grades earn no credits and are not considered hours completed. Transfer credit hours accepted by Diné College are not calculated in the CGPA to determine satisfactory progress.

Academic Status Change
When change of an “Incomplete” (I) or “In Progress” (IP) grade alters a student’s academic status, the student is notified immediately in writing of such change by the Registrar. When the changes are formally adjusted, it places the student on academic probation or suspension and the restriction is effective immediately.

Academic Suspension
A student who does not satisfactorily meet the minimal standards required during the probationary semester will be placed on academic suspension. Academic suspension means the student will not be permitted to enroll in any classes at Diné College for the semester of suspension. Upon returning, the student will be placed on academic probation until minimum standards for satisfactory progress are met. Academic suspension is not recorded on a student transcript. A student may appeal academic suspension by obtaining appeal information from the Registrar’s Office.

Access to and Confidentiality of Records
Social Security or CARS numbers are used for students' identification and records only. The Family Education Rights and Privacy Act, FERPA of 1974 protect the privacy of such information. The College provides access to specified official records related to the student and an opportunity to change such records if they are inaccurate while providing for the challenge of actual grades received.

To insure that their rights are upheld, students are required to file requests for non-disclosure on an annual basis if withholding of directory information is desired. Such requests will be honored for one academic year. Only the Registrar’s Office and other authorized personnel have access to student files. An authorized personnel is a person employed by the college in an administrative, supervisory, academic research, or support staff position (including law enforcement unit personnel); a person or company with whom the college has contracted (such as an attorney,
auditor, or collection agent); a person serving on the Board of Regents; or a student serving on an official committee or assisting another school official in performing his or her tasks.

**Adding Courses**
Students may add classes with the instructor’s permission during the first and second week of the semester by completing a Drop/Add form available at the Registrar’s Office or the respective regional office. Students are expected to submit the form and obtain a new schedule to make the action official. This includes reinstatement after an instructor drop.

**Audits**
Students must declare their intent to audit a course on the registration form at the time of registration and the course will be entered as an Audit. Audited courses earn no credit or grade. Auditors are not permitted to change course enrollment to receive credit, or vice versa, after the close of the Drop/Add period. Auditors must comply with all policies established for regular students and pay tuition and fees at the same rate. The Financial Aid Office will not process any aid for applicants who are auditing course(s). (See Financial Aid Student Manual / Handbook)

**Audit Grade (AU)**
The AU is awarded for participation and does not indicate proficiency in the subject matter. It is not included in the GPA or CGPA.

**Change of Grade**
Circumstances necessitating a change of grade may include a clerical error made by the instructor or data entry personnel in preparing the grade report or the change of an “Incomplete” grade. With the exception of the “I” grade, a grade may be changed within one academic year from the time it was given. During this period, the Division Chairperson or the Regional Director and the appropriate Division Academic Dean must approve the grade change before the grade is recorded on the transcript.

**Class Attendance**
Students are expected to attend class. Instructors must announce and publish attendance requirements for each class and have final authority to excuse students from class; however, once an instructor excuses a student, he/she must not penalize the student for the approved absence. Conflicts about excused or unexcused absences must be resolved between the student and the instructor.

Students assume responsibility for all absences and must make arrangements with their instructors to make up work. The instructor may drop students with excessive absences from a course. Students have the option to appeal such drops to the appropriate Division Chair and Academic Dean.

**Course Load**
The normal course load is twelve 12 to sixteen 16 credits each semester. A course load of twelve 12 credits is the minimum permitted for full-time student status. Students wishing to enroll for 17 or more credits, up to twenty-one 21 credit hours per semester must have approval from their advisor and petition the appropriate Division Academic Dean for approval to carry an overload. The student must have a 2.50 GPA the prior semester in order to petition. Under no circumstances may a student enroll for more than 21 credits in one semester. Credits earned through Credit by Examination (CLEP) are not counted in this limitation.

**Course Change or Cancellation**
Diné College reserves the right to change or cancel without notice any scheduled course or to change the day, time, location, or instructor of any course.

**Credit-by-Examination**
Students who are currently enrolled in Diné College may apply for credit-by-examination in certain courses by contacting the appropriate Division Academic Dean. The Registrar and the Division Chairperson must also grant permission. Students may not petition to challenge a course a second time, nor may they take an exam for a course in which they have previously enrolled. Each academic division may have additional qualifications. Students must register for examinations by the end of the fourth week of classes. Students at the Regional Sites may need to take the exam at the Tsaile Campus. Students must pay for the cost of the examination and the tuition fees, which are
non-refundable. The exam and other division requirements must be passed with a grade of A, B, or C for credit to be given. A notation of “Credit by Examination” is placed on the transcript. The grade is included in the total earned credit hours but is not computed in the total grade point average. Students should note that Diné College's credit by examination may not transfer to other colleges and universities.

**Definition of Semester Hour**
Diné College operates on a 16 weeks, two-semester system, with summer sessions. All credits earned are expressed in semester hours. A completed semester hour represents a total of 15 contact hours per semester.

**Dropping Courses**
Students dropping a course beginning the third week of the semester will pay a $2 fee for processing the Drop form. It is the student’s responsibility to drop a course.

- The student may drop courses by completing a Drop/Add form available from the Registrar’s Office or the respective site. The Drop/Add form must be signed by the instructor of the class and the student’s advisor.
- Completed Drop/Add forms must be returned to the Registrar’s Office or to the respective sites for processing by the drop deadline date. (See Academic Calendar.)
- A course dropped in the first two weeks of the semester will not appear on a student’s transcript.
- A grade of “W” will be recorded for all classes dropped beginning the third week of the semester.
- Residential students dropping below 12 at any time during a semester lose eligibility for campus housing. Any appeals to this must be submitted to Residence Life.
- Students receiving financial aid must check with the Financial Aid and Scholarships Office for continued financial aid eligibility.
- Any student who discontinues a course at any time without officially dropping the course is subject to a grade of “F.”

**Drop by Instructor**
An instructor may drop a student prior to the last two weeks of the semester, not including final exam week. The appropriate Division Academic Dean must approve instructor drops instituted after the eighth week of the semester. Instructor drop cards must be returned to the Office of Records and Admissions by the instructor or division secretary for processing and must include the reason(s) for the drop. After an instructor has dropped the student, the Financial Aid and Scholarships Office and Residence Life are notified. A student may appeal an instructor drop by submitting a Grade Appeal to the appropriate Division Chair and Academic Dean. The student will be responsible for payment of tuition and reinstatement fee.

**Enrollment Status**
The number of credit hours carried per semester indicates a student enrollment status. A full-time student carries 12 or more credits per semester and must complete 24 credits in an academic year. A three-quarter time student carries 9 to 11 credits per semester and must complete 18 credits in an academic year. A half-time student carries 6 to 8 credits per semester and must complete 12 credits in an academic year.

Students who have earned less than 32 credit hours are classified as freshmen. Students with more than 32 credit hours and no more than 72 credit hours are classified as sophomores.

**Final Examinations**
Final examinations are given at the end of each semester. Students must take their final examinations during the scheduled time period. Students who fail to take final examinations may receive a failing grade and jeopardize their academic status.

**Grade Point Average System**
Grade Point Average (GPA) refers to the average grade at any particular time during, or at the end of, any particular semester. It is determined by the total number of credits divided by quality points earned. Quality points are figured as follows: A = 4 quality points, B = 3 quality points, C = 2 quality points, D = 1 quality point, and F = 0 quality points. For instance, if a student receives an A in ENG 101 (3 credits x 4 quality points = 12), B in MTH 110 (3 credits x 3 quality points = 9), and C in PSY 111 (3 credits x 2 quality points = 6), that person's GPA would be 3.00 (27 total quality points divided by 9 credits = 3.00).
The Cumulative Grade Point Average (CGPA) is the average for all courses taken at the college. It is computed by taking the sum of all quality points earned while in attendance at Diné College divided by the sum of all eligible credit hours earned. The following rules are considered in computing the CGPA:

- Courses that are repeated are counted only once for credit and the CGPA; however, all repeated courses appear on the student's transcript.
- The higher grade is used for computing the CGPA whenever a course is repeated.
- Certain courses can be repeated for credit and therefore are exempt from the two rules above (e.g., 099, 199, and 299 courses; students should consult with their advisor).
- When grades of “I” or “IP” have been changed to letter grades, they are computed in the CGPA.
- A “CR” grade is computed in the total credit hours earned, but is not included in the CGPA.
- Individual instructors or academic divisions have specific policies and requirements for the “IP” grade. Students are advised to check each course syllabus carefully to be informed about the “IP” grade policy for courses.
- F, a failing grade, is shown on the transcript and computed in the CGPA unless the student retakes the course and passes at which time the passing grade is entered on the transcript and the quality points are computed in the CGPA and the semester GPA.

**Grade Reports and Transcripts**

At the end of each semester, a grade report is issued to each student. Only final semester grades are recorded on the student’s permanent transcript record. A student may request an official transcript from the Registrar’s Office, at Tsaile Campus, via a transcript request form. The fee is $5 for each transcript processed through the mail. The Registrar’s Office does not process immediate requests for hand carried transcripts. An unofficial transcript may be given directly to the student at no charge. For admission purposes, other institutions accept only official transcripts sent directly from the College. Transcripts or any other information related to a student’s matriculation are not released if the student has an outstanding financial obligation to the College. Grades remain on transcripts unless challenged by the student. Discrepancies found which cannot be substantiated by the Records and Admissions Office must be proven by the student. The student must notify the Registrar’s Office in writing of changes in name, address, telephone number, or any other record information.

**Incomplete Grade (I)**

This grade indicates incomplete course work. The "I" must be converted to a grade by the end of the following regular semester, or it automatically changes to an “F.”

**In Progress Grade (IP)**

This grade indicates that the student has met attendance requirements and has worked continuously toward meeting the objectives of the course but must re-enroll in the course the next semester the course is offered. The IP may be given only once for the same course only in the following Developmental courses: ENG 100A and ENG 100B; FST 129, 130, 131, and 133; and MTH 011, 051, and 100.

**Non-Grade Designations Credit (CR)**

This grade is awarded through a challenge examination. It is included in the total earned credit hours, but is not computed in the GPA or CGPA.

**Mid-term Examinations**

Mid-term examinations are given mid-way thru each semester. Students must take their mid-term examinations during the scheduled time period set up by the instructor. Students who receive a failing grade in a course must see their instructors or advisor to take necessary steps for improvement to avoid jeopardizing their academic status.

**Participation in College Activities**

Participation in official college activities is encouraged and allowed upon approval. The sponsor of such activities must submit a travel form to the appropriate Division Academic Dean 24 hours prior to date of travel. Students must maintain a 2.00 CGPA or better and up to date on assignments and exams in order to participate in college activities. The student must process an institutional absence form prior to departure.
Repeating Courses (R)
Students may repeat courses previously taken at the College to better their understanding or to improve their grades. A transcript shows that the course was repeated, but only the higher grade is used to compute the student’s Cumulative Grade Point Average, CGPA. Exceptions can be made for certain courses such as two courses with the same course number but different topics, i.e. 099, 199, and 299 courses. Repeating a course a student received prior financial aid for, see Financial Aid Student Manual / Handbook.

Satisfactory Academic Progress Policy (SAP)
The Satisfactory Academic Progress Policy delineates requirements for satisfactory academic progress as well as guidelines for academic probation and academic suspension. They are:
- Full-time students are placed on academic probation if, upon completion of 12 or more semester credit hours, they have a semester grade point average less than a “C” (2.0). If a student’s number of semester credit hours drops below 12 as a result of an IP grade, the student is still considered to be making satisfactory progress.
- Part-time students who have accumulated 16 or more semester credit hours are placed on academic probation whenever a total of 11 or less semester credit hours of work have been attempted and a cumulative grade point average less than a “C” (2.0) is earned.
- The Satisfactory Progress Policy applies to part-time students who have not yet accumulated a minimum of 16 semester credit hours.
- Students on academic probation may take no more than 14 credit hours per semester unless approved by the appropriate Division Academic Dean.
- Students placed on academic probation or academic suspensions are subject to additional regulations regarding SAP. Students should contact the Financial Aid Office for pertinent Financial Aid (SAP) regulations.

Withdrawal Grade (W)
The student may institute this grade, or the instructor may use it to indicate excessive absenteeism. In the latter case, the student has the right to appeal this status in writing to the Appropriate Division Academic Dean. See Financial Aid Student Manual / Handbook for details on Return of Title IV Repayment.

Withdrawal from the College
Students must officially withdraw from the College using a withdrawal form available from the Registrar’s Office or respective campus site. Failure to withdraw properly results in the forfeiture of any refunds, and a grade of “F” is given for each course in progress at the time of the unofficial withdrawal. Withdrawal forms must be returned to the Registrar’s Office with all of the required signatures.

Academic Recognition

Dean’s Honor List
The Dean’s Honor List recognizes academic excellence on a semester to semester basis. Students must achieve a semester grade point average of 3.50-3.99, complete a minimum of twelve credit hours, and receive no grades of “I” or “IP.”

Dean’s Honorable Mention List
The Dean’s Honorable Mention List recognizes academic achievement on a semester to semester basis. Students must achieve a semester grade point average of 3.20-3.49, complete a minimum of twelve credit hours, and receive no grades of “I” or “IP.”

Graduation Honors
Upon graduation, three special academic recognitions are made for the following outstanding cumulative grade point averages. Cum Laude, 3.50-3.69, Magna Cum Laude, 3.70-3.89 and Summa Cum Laude, 3.80-4.00.

President’s Honor List
The President’s Honor List recognizes the highest level of academic excellence on a semester to semester basis. To qualify, a student must have a 4.00 grade point average and complete a minimum of twelve credit hours with no grades of “I” or “IP.”
Fees and Payments

Non-Refundable Fees

Application (new first time students) ............................................. $20
Cleaning* ...................................................................................... $15

Ten-Week Bookstore & Housing Refunds
1-3 calendar days ............................................ 100%
4-7 calendar days ............................................ 75%
After 7th calendar day ........................................ 0%

Deferred Payments
To be eligible for a deferred payment schedule, students must have no prior default payments or financial obligation to the College. Students whose financial aid is pending may complete a deferred payment schedule at the time of registration. A student’s enrollment may be cancelled if all fees are not paid according to the promissory note and deferred payment schedule. Students who request deferred payments must present verification of employment for themselves or their parent(s) and submit a promissory note to the Finance Office. Deferred payment requests are reviewed and approved on an individual basis by the Finance Office for Tsaille and Shiprock Campuses. The Regional Directors review and approve Regional sites student deferrals.

Due to federal regulations, the Financial Aid Office will not process any assistance for student with prior outstanding balances greater than $150.00. All expenses from prior semesters must be paid under $100.00 and student must sign contract in FAO to allow for future financial aid to pay outstanding balances. Student who have not maintained Satisfactory Academic Progress (SAP) while receiving financial assistance in two consecutive semesters are placed on SUSPENSION. During the suspension period, FAO will monitor the progress of student and all current charges must be paid before any future award eligibility is determined.

Payment Options
Diné College accepts cash, money orders, VISA or MasterCard debit and credit cards only. The Finance Office accepts debit or credit payments of tuition and fees over the phone. The college does not accept personal checks. Students with a student account balance in excess of $150.00 are not allowed to register. Students must have a zero balance to request an official transcript. Unofficial transcripts are free of charge.
Student Services

Academic Advising
Academic advising is a vital service to students regarding programs of study and career options. It ensures that students have information necessary to make good decisions about their future. Students are assigned an advisor; an advisor may be a faculty or academic advisor, to provide guidance on academic programs in general, and degree checklists, specifically. Degree checklists are issued by the Registrar’s Office or may be obtained from an advisor. The checklist should be utilized before registering for classes. While advisors are initially assigned to students, students may request a change by completing a Change of Advisor form available in the Registrar’s Office.

Other services available through the program include Academic Advising, Career Counseling, New Student Orientation, Referral Services, GED Testing, Transfer Assistance and Veteran Assistance. An advisor who assists students with admissions, academic advising, transferability, placement testing, career assessment, financial aid, and registration is also available at each Regional Center. Referrals are made to professional counselors in governmental agencies or private counseling facilities.

Associated Students of Diné College
The Associated Students of Diné College (ASDC) is the student government body of the College. All registered students are members of the ASDC. Students elect officers during the spring of each academic year. The ASDC President serves as a voting member on the President’s Council and the Board of Regents. The association coordinates chartered clubs and organizations with the Student Programs.

Athletics and Intramural Sports
The College promotes intercollegiate men’s and a woman’s cross-country and track, archery, and rodeo. The cross-country team has won national championships in six of the past 11 years. The archery team is sanctioned by the College Division of the National Archery Association. In recent years, it has ranked third in the nation. The Rodeo team holds membership in the National Intercollegiate Rodeo Association, Grand Canyon Region. In recent years, its members have placed individually and as a team at regional and national competitions. Intramural and extramural sports are offered at Tsaile Campus.

Bookstores
The bookstores at Tsaile and Shiprock provide textbooks, art supplies, office supplies, and personal items. Textbooks for Regional Center courses are available for purchase on-site for a limited time at the beginning of the semester.

Campus Safety
The Tsaile Campus Police Department operates on a 24-hour, year-round basis and has full authority Peace Officers and non-commissioned Security Officers. Shiprock Campus is served by Security Officers. All sites are assisted by the Navajo Department of Law Enforcement.

Diné College Libraries
Library services are available to the College’s students, faculty, and staff at all campuses and Sites. Located at the Crownpoint, Shiprock, and Tsaile Campuses, the collections offer 90,000 books, 3,000 videos and DVDs, 600 magazines, newspapers, and journals in print and microform, and online access to much more. The catalog may be searched online at http://library.dinecollege.edu. Students, faculty, and staff may request to have circulating materials delivered from any Diné College library to any Diné College campus or center using their library issued barcode. Subscription based online databases may be accessed through the College’s computer network, or by logging in with a library issued barcode, subject to appropriate license agreements. The libraries can be reached at 1-800-495-6040 or via e-mail at: library@dinecollege.edu.

Diné College Web Site
The College web site provides current information about all aspects of our programs and services. It is located at http://www.dinecollege.edu/
Eligibility for Activities
Any student may participate in extra-curricular activities provided by the College except as restricted by regulations established for campus organizations and intercollegiate activities. Students must maintain good social standing as well as a cumulative 2.00 GPA or better. Any student on academic probationary status is ineligible to hold office in any student organization or to participate in intercollegiate athletic competition (see the following section) until the deficiency is removed.

Eligibility for Intramural Sports Certification
For prospective student-athletes, a properly completed Eligibility Form must be filed with the Registrar’s Office prior to participation in intramural or intercollegiate sports. Student athletes are not permitted to participate in athletic competition without proper certification.

- Attendance
  Student athletes must be duly admitted and maintain regular attendance in each course. Athletes are responsible for maintaining the attendance requirements as described in the course syllabi.
- Satisfactory Academic Progress (SAP)
  Student athletes must demonstrate satisfactory progress with a 2.00 CGPA or higher to continue athletic participation and maintain enrollment of 12 credit hours. Student athletes who drop below 12 hours and/or whose CGPA falls below 2.00 are immediately ineligible for athletic participation.
- Satisfactory Completion
  To be eligible for the next semester, a student athlete must have passed 12 or more credit hours with a 2.00 CGPA or higher.
- Falsification of Records
  Student athletes who falsify their academic records shall become immediately ineligible from further participation and competition.

Eligibility requirements for Intercollegiate Sports
For a student to be eligible for any intercollegiate competition, the student must conform to the following regulations:

- The student must be a graduate of an accredited high school or have earned a graduate equivalent degree (GED).
- All students must be enrolled in a recognized academic program and be making progress towards a 2/4 year degree at the attending college.
- All students must be enrolled in a minimum of 12 credits at time of participation. If a student is enrolled in less than 12 credits, he/she will be considered part-time for eligibility purposes.
- Second semester students must: a) pass 12 credit hours his/her first term, b) must have achieved a GPA of 2.0.
- Thereafter, all students must pass 24 credit hours the two preceding terms of attendance.
- After accumulating 24-48 credit hours, the student must have achieved a 2.0 cumulative GPA.
- After accumulating more than 48 credit hours, the student must achieve a 2.0 cumulative GPA.
- Summer and inter-term credit hours can be used to satisfy the 12/24 credit hour rule and GPA requirement. Summer credit hours should be attached to the preceding spring term for eligibility purposes. Winter term credits should be attached to the first semester.

Foundation Studies (FST)
Foundation Studies provides classes in developmental reading, writing, and mathematics. Academic support is offered through FST mini-courses that focus on time management, note taking, test taking, and active listening skills. The College Success course prepares students for the demands of the competitive college scene and world of work. FST courses bridge academics to careers and vocations. Foundation Studies courses are provided at all campuses.

General Education Development (GED) Testing
The Student Services Program at Tsaile Campus administers GED Tests for individuals who are at least 18 years of age and have not completed high school. If an individual successfully completes the GED tests, the student is sent an official transcript and a GED Diploma in the mail from Arizona Department of Education. A fee of $25 is charged. For more information, call (928) 724-6727.
The Shiprock Learning Center also administers GED Tests monthly with additional testing dates as necessary. The fee is $10 per test or $50 for the entire battery. Individuals must be 16 or older, have a Referral Form from a local ABE/GED program, and have a New Mexico state issued identification card or driver’s license. With passing scores, the State of New Mexico issues a high school diploma and transcript. For more information, call (505) 368-3565, or log on to http://shiprock.dinecollege.edu.

Health Services
All Arizona students are encouraged to either complete the Arizona Health Care Cost Containment System (AHCCCS) forms with the Arizona Department of Economic Security at the Tsaile Health Clinic for Tsaile residents or to provide information on family health care insurance. Services are available at the Tsaile Health Center to the extent that “the provision of such health service will not result in a denial or diminution of health services to [other] eligible Indians.” Health services are available to all Diné College Americans Indian students through the U.S. Public Health Service. Non-Indian students are seen in emergencies, and eye and dental care is not available.

Students not eligible for Public Health Services are responsible for any health care costs incurred while they are students at Diné College. Diné College offers private health insurance for domestic and international students and their dependents. Information on this program is obtained from the Dean of Student Services.

Ned Hatathli Museum
The museum is a component of the Center for Diné Studies and is located on the third and fourth floors of the Ned Hatathli Center at Tsaile Campus. It features a variety of audio-visual exhibitions plus traveling exhibits, workshops, and lectures. The permanent collection consists of historical manuscripts, films, tapes, photographs, and Navajo and other tribal artifacts.

Student Clubs and Organizations
The Associated Students of Diné College has chartered the following student organization, mainly at Tsaile Campus. Call your local center for participation in some of these clubs.

- AIHEC Academic Bowl Team (Knowledge, Science, Business, Art)
- American Indian Business Leaders Club
- American Indian Science and Engineering Society
- Arts Club
- Basketball Club
- Billiards Club
- Campus Ministry
- Expedition Club
- Literary Club
- Music Club
- Native American Church Club
- National Intercollegiate Rodeo Association Team and Club
- Residential Halls Club
- Student Baha’i Association Club
- Veteran’s Association of Diné College
- Volleyball Club
Student Complaints
Students have the right to submit significant complaints in writing to College authorities. Such complaints are duly considered. Forms for registering complaints are available at the Student Services, Academic Affairs, and Regional Directors’ offices.

Student Rights and Responsibilities
All Diné College students have rights and responsibilities identified in the Student Code of Conduct Booklet. Copies may be obtained from the Student Services Office or Regional Center offices.

Students with Disabilities
The college provides reasonable educational support and other academic services to disabled students. A student with disability who wishes to enroll for classes should contact Student Services at the Tsaile Campus or the designated representative at the Regional center.

Students in postsecondary education are responsible for self-identifying themselves as individuals with disabilities, providing disability documentation, and requesting accommodations. The college is responsible for providing reasonable accommodations for qualified students with disabilities. The college does not provide special education versions, IEP (Individualized Education Programs) plans, specialized progress reports, etc.

Primary and secondary schools are legally mandated to identify students with disabilities and provide a free and appropriate education for the needs of students with disabilities. Because of this, many students with disabilities and their families think high school disability records automatically transferred to the college along with academic records, and the college continues services and accommodations in high school. However, this is not the case. In postsecondary education, the responsibility to identify a disability lies with the student, if in fact he or she desires to request services and accommodations on the basis of disability. Records regarding disability do not automatically transfer from high school to college. Such records can only be released or transferred with the written permission of the adult students (in cases where the student is under the age of 18, parent or guardian permission is also required).

Under federal law, family members are not provided with access to student information regarding disabilities, accommodations or academic progress. Disability related information and documentation are treated the same as medical information and handled under strict rules of confidentiality. Information is shared only on a limited basis within the college and then only when there is a compelling reason for the individual seeking the information to have knowledge of a special aspect of this confidential information.

FERPA (Family Educational Rights and Privacy Act of 1974), also known as the Buckley Amendment, provides faculty with free access to educational information in institutional files regarding students with whom they are teaching, advising or other capacity. Disability related records are excluded from free access under FERPA. Also excluded from free access under FERPA are inquiries external to the institution related to a student's disability or academic progress.

Veterans’ Assistance
Tsaile and Shiprock Campuses have a Certifying official to assist veteran students with using their educational benefits. Diné College curricula and courses are approved by the Arizona and New Mexico Veterans Commission State Approving Agencies. For additional information contact the Student Services Program at the Tsaile or Shiprock Campuses.

Financial Aid and Scholarship Services
Diné College administers federal, state, tribal, and institutional grants and scholarship programs to assist students based on financial need or academic merit. Available funds are used to provide financial assistance to qualified students. Students are responsible for initiating the application process for financial assistance and scholarships. They are encouraged to apply as early as possible.

Students are eligible for federal financial aid if they are enrolled in a degree or certificate program. The degree program should be at least one academic year in length and the student must make satisfactory academic progress.
Financial Aid Application Procedures
All students must complete the following:
  • Free Application for Federal Student Aid (FAFSA) is available at Dine College’s Financial Aid & Scholarship Office at Tsaile, Shiprock and Community Center sites, any high school counselor’s office, or the FAFSA website at www.fafsa.ed.gov.
  • Financial Aid Data Form and other financial aid information are available at Dine College’s Financial Aid & Scholarship Office and online at: www.dinecollege.edu/.

Financial Aid Satisfactory Academic Progress Policy (SAP)
Students must maintain satisfactory academic progress to remain eligible for most scholarships. Such progress depends upon academic achievement, credits earned, and length of program. See the Financial Aid Student Handbook for detailed information.

For financial aid purposes, a full-time student placed into developmental reading, writing, and mathematics courses must: (a) complete at least 12 credits each semester with a grade of A, B, C, D, or IP with a Semester Grade Point Average of 1.80 or better, and (b) accumulate credits that count toward a degree / certificate.

Note: First time freshman must carry 12 or more credits which is a full-time course load consisting of two developmental courses and two college level courses their first year of college or the 1st and 2nd semester). When a student reaches freshman classification: student must earn 80% of coursework each semester while attending fulltime in the 3rd and 4th semester. The final classification: Sophomore, the student must satisfactorily complete 80% coursework to maintain SAP.

Dine College Scholarships
These scholarships are established by public sources and private donors. Support is based on the availability of funds:
  • American Indian College Fund
  • Cross Country, Rodeo, and Archery Scholarships
  • Aura Brous Scholarships
  • Cornelius C. Wood Scholarships
  • Lawrence Livermore National Lab Scholarships
  • Student Residential Assistance Scholarship

Federal and State Financial Aid and Scholarship Programs
These scholarships are funded by the federal and state governments:
  • Leveraging Educational Assistance Partnership (LEAP)
  • Federal Work Study (FWS)
  • Federal Pell Grant (FPG)
- Federal Supplemental Educational Opportunity Grant (FSEOG)
- Veterans Administration Educational Benefits (VA)
- New Mexico Student Incentive Grants (NMSIG)
- Americorp Scholarships
- Workforce Development

**Navajo Nation Scholarship and Financial Assistance (ONNSFA)**
For ONNSFA requirements, see ONNSFA Policies and Procedures or Financial Aid Student Manual / Handbook

**Navajo Nation Chapter Scholarships**
Navajo Nation Chapter Assistance is available at each chapter throughout the Navajo Nation. Applicants must be a registered member with their respective chapter.

**Navajo Education Foundation**
Annie D. Wauneka Scholarships is available through a private non-profit foundation located at the Education Center in Window Rock, Arizona. Applications may be obtained at the Financial Aid and Scholarship Office.

**Other Scholarships**
Many students are awarded scholarships by local organizations such as churches, business, and civic groups. Others receive assistance from an employer, credit union, corporation, foundations, or professional association. The Financial Aid and Scholarship Office have information about the following:
- American Indian Service Scholarships
- Edward Coffey Memorial Scholarships
- Gates Millennium Scholarships
- Gertler Scholarships
- Indian Health Service Scholarships
- Project Love Scholarships

**Utah Navajo Trust Fund**
The Utah Navajo Trust Fund makes available financial aid to Navajo residents of Utah. The office is located in Blanding, Utah. Applications are available at the Financial Aid and Scholarship Office.

**Financial Aid Refund and Repayment Policy**
If students receiving federal financial aid withdraw from the college, the amount of the financial aid to be repaid or refunded is calculated using a formula supplied by the U.S. Department of Education. The last day of attendance is used to calculate the total amount to be repaid. A refund is the difference between the amounts paid towards institutional cost (including financial aid and/or cash paid) and the amount the school may retain under the appropriate refund policy. See the Financial Aid Student Handbook for detailed information on the Title IV Refund/Repayment policy.

Students do not receive a transcript (official or unofficial), or a diploma until all financial obligations to the College are cleared. Students are not allowed to register for a subsequent semester until the outstanding account is paid in full. Repayment is the amount of aid disbursed to the student for non-institutional costs which must be repaid to the Title IV program. Non-institutional cost is the educational cost not payable directly to the school. Again, see the Financial Aid Student Handbook for details.

The distribution of refunds is made according to the following priority list:
1. Federal Pell Grant Program
2. Federal Supplemental Educational Opportunity Grant Program
3. State Student Incentive Grants

**Right to Appeal & Financial Aid Appeals Committee**
Students who fail to maintain satisfactory academic progress and are notified of their financial aid suspension may appeal their eligibility status to the Financial Aid Appeals Committee. The Appeals Committee will review the
appeals. An appeal should be based on extenuating circumstances as documented by the student. The results of the appeal will be sent to the student following the Financial Aid Appeal Committee’s consideration and decision.

**Student Consumer Information**
Diné College provides current information through annually updated publications on student’s rights and responsibilities concerning financial aid. Students may obtain copies of the Financial Aid Student Handbook and the Student Guide at the Financial Aid & Scholarship Office in person, by mail, telephone or at Diné College website [www.dinecollege.edu](http://www.dinecollege.edu). Students who attend the Regional centers are treated the same as students attending Tsaile or Shiprock, and are eligible to receive federal, state, and private financial aid and/or scholarships.

**Shiprock Student Services**

**Student Programs**
Shiprock Campus sponsors athletic events, student dances, American Indian presentations, and an annual art show. Shiprock Associated Students schedule activities for the college community through seasonal events at Halloween, Thanksgiving, and Christmas.

**Adult Basic Education/General Education Development Program**
The Adult Basic Education/General Education Development (ABE/GED) Program at Shiprock Campus offers preparatory classes for individuals who want to improve reading, writing, and mathematics skills or who want to earn their GED diploma. Individuals who are 16 or older and have not completed high school are eligible. Enrollment can occur anytime throughout the year. Other ABE/GED sites operated by the Shiprock Office include Sanostee, Newcomb, and Cudeii. For more information, contact the ABE Coordinator at (505) 368-3563.

**Shiprock Learning Center**
The Learning Center at Shiprock Campus provides a friendly atmosphere for studying. Peer tutors assist students who may encounter academic difficulty. Individualized and group tutoring is always available. The Learning Center administers College Placement and Ability to Benefit Tests. Computers are available with internet access and a variety of software programs, including Choices, a career assessment. The Learning Center also houses the ABE/GED Program. For more information, call (505) 368-3564.

**Special Programs**

**Bachelor Degree Program**
Individuals interested in completing a Bachelor degree in Elementary Education can take their general studies courses fulfilling their Freshman and Sophomore years at Diné College, then transfer to the Center for Diné Teacher Education (CDTE) at the Tsaile campus. All of the courses for the Junior and Senior years are provided by CDTE through an agreement with Diné College and Arizona State University (ASU). Students successfully completing the courses receive a Bachelor of Arts degree with two endorsements (Bilingual and English as a Second Language). Students selected for admission to this program must complete the application and interview process to become Bachelor degree candidates. Students must work closely with CDTE faculty advisors to ensure appropriate courses are taken.

**Diné Policy Institute (DPI)**
Through Sa’ah Naaghai Bik’eh Hozhoon, Diné Policy Institute provides quality research to facilitate and analyze issues and educate all people, enhances and ensures that well-reasoned policies are developed to protect the sovereignty and cultural integrity of the Ni’hooka’ Dine’ę’, in order to renew the principles and values of Sa’a Naghai Bik’e Hozhoon.

**Diné Environmental Institute (DEI)**
DEI conducts environmental studies through field and laboratory research and analysis, culturally relevant curriculum development, educational instruction, data collection and data management, including repository archiving and sharing, policy formation, community outreach and training, and environmental project management.
Institute for Integrated Rural Development (IIRD)
(IIRD) develops and implements education, research, student orientated hands-on activities and community participation, to promote and provides a learning environment in agriculture and food science, and environmental science. IIRD also provide services in extension services, community education, professional development, curriculum development and rural community and economic development.

Currently, IIRD has the Navajo Textile Project, Animal Care and Management, the Native Landscaping Project, Nutrition for Young Children, Tsailie Watershed Research Project and the Sheep is Life Project. IIRD will be extending its educational services into GIS, youth development, small farms and the invasive plants field to expose students and community members into these various areas. IIRD office is located on the second floor of the Hatathli Center. For more information, call 928-724-6941.

Navajo Dryland Environments Laboratory
The Navajo Dryland Environments Laboratory at Shiprock Campus is an institute for education and research in the environmental sciences and environmental technology. It is part of a consortium that includes New Mexico’s three major research universities and two national laboratories. The program maintains teaching and research laboratories for environmental science, chemistry, and geology. The program supports the Environmental Science degree, field based research and consulting on environmental issues of interest to the Navajo Nation, and scientific research projects by Diné College students. For more information, call (505) 368-3556.

Research Initiative for Scientific Enhancement (RISE)
Funded by the National Institute of Health and based primarily at Shiprock Campus, the RISE Program promotes teaching, learning, and research in the health and social sciences for students, faculty, and local reservation communities. Dine Educational Philosophy provides a foundation for the program. Students conceptualize, plan, implement, and validate their progress in achieving academic and career goals. Activities for students include academic skills workshops, mentoring and advising, a Navajo Professionals lecture series, peer mentorship, supplemental instruction in key courses, and lab based research assistantships at Diné College and other institutions. For more information, call (505) 368-3555.

Summer Research Enhancement Program
This program prepares American Indian students for careers in diabetes prevention research. It is also designed to strengthen the research capabilities of Tribal Colleges and Universities. The 10 week, summer program is available to freshman and sophomore college students who are interested in developing research skills and participating in community based projects within the Navajo Nation or other American Indian communities. For more information, call (505) 386-3555 or (928) 724-6936.

Uranium Education Program
Diné College's Uranium Education Program is partnership project designed to examine health issues arising from the environmental impacts of uranium mining on the Navajo Nation. Partners include Diné College, IHS physicians, the Navajo Division of Health, Saccomanno Research Institute of Grand Junction, the University of New Mexico Center for Health Promotion for Rural American Indians, Northern Arizona University's Environmental Outreach Program, the EPA, the US Army Corp of Engineers, and researchers with expertise in radiation and environmental health issues. The program's purpose is to assess local information need, plan mitigation actions, evaluate educational efforts, and empower local community members. For more information, call (505) 368-3515.
Tsaile Student Services

Food Services
Tsaile Campus provides food services in a spacious dining hall. Hot meals, cold deli and salad bars, and freshly baked goods are featured daily. Hot and cold sandwiches, as well as a variety of snacks, are also available. Visitors are welcome. Dinners and banquets for large groups are available by prior arrangement only. For meal plans, refer to the Fees and Payment section.

Meal Plan for Resident Students at Tsaile Campus
All residence hall students must comply with housing policies and purchase a 19, 15, or 14 meal plans. All Resident students with dependents must purchase either a 15 meal plan or a five meal plan for dependent(s), aged 0-11 years.

<table>

Residence Life
Diné College provides eight residential halls for students at Tsaile Campus: Three coed residences and five non-coed residences which include housing for married students. Each hogan shaped hall features a circular fireplace located in a common area with Dish Network Satellite System. Students must provide their own linens and are responsible for maintaining the cleanliness of their rooms. Coin operated washing machines and dryers are available in each residence hall. Housing policies and regulations can be obtained from the Manager of Residence Life. Dependents ages must be one to 11 years of age.

Residential halls and off-campus housing are not available at Shiprock Campus and the six Sites. Students applying for housing must submit the following:
- Diné College Housing Application – With a signed Terms and Conditions
- Purchase a 19, 15, 14, or 10 meal plan
- $5.00 Parking Permit, if applicable

Married Student and Single Parent Housing
One residence hall for legally married students and single parents is available at Tsaile Campus. It is not designed to accommodate families; however, one or two dependents may reside with a parent. Because of limited space and health standards, no more than two children each under the age of 12 are permitted to live in the halls with their parents. Birth certificates indicating direct descent or legal adoption must be presented. Only full-time students are eligible to live in residential halls.

Both husband and wife must attend full-time to reside in the Residential Hall. A single parent must also be a full-time student. Single parents with one dependent are assigned a single occupancy room at the single occupancy rate. Parents must purchase a meal plan for their dependent(s). Proof of financial support to meet the added expense should accompany the initial request. Such requests will be handled on a space availability basis and only after the first two weeks of each semester. Parents must have verification of financial support for their child or children from the Financial Aid and Scholarships Office and meet Head Start eligibility requirements before housing is assigned.

Guest Housing
Overnight guest(s) of students or of the College may rent a room for $35 for a double room and $25 for a single room. Reservations should be made with the Manager of Residence Life. Enrolled Diné College students may rent a room for $10 per person per night.
Head Start for Dependent Children
The Navajo Tribal Head Start Program accommodates children between the ages of three and one-half to five years. Interested parents should contact the Tsaile Head Start Program at (928) 724-2209, or contact the nearest Head Start Agency office:

- Chinle Agency: (928) 674-2141
- Crownpoint Agency: (800) 782-7870
- Ft. Defiance Agency: (928) 729-4016
- Shiprock Agency: (505) 368-1200
- Tuba City Agency: (928) 283-3223

Tsaile First-Year Cohort Program
The First-Year Cohort Program is for entering students at the Tsaile campus that offers first year students an opportunity to develop college success skills while making friends and helping the local community. The program also offers pre-semester orientation to the Diné College philosophy, college life and academic procedures as well as an opportunity to shorten the time spent in developmental classes.

To qualify for this program you need to be placed in one of the developmental reading classes, (FST 129, FST 130 or FST 131 or developmental math classes, (MTH 011, MTH 051, or MTH 100). Most students completing this program have exited with a higher then average grade, an earlier start for college level classes, knowledge of academic procedures, and a developed supportive network of friends, faculty, and staff. For information, call (928) 724-6614.

Tsaile Student Union
The Student Union Building (SUB) at the Tsaile Campus serves as the campus center for students, faculty, and staff. Students have available seasonal activities that make extracurricular life fun. In the SUB are a student employment office, computer lab, study area, meeting rooms, game room, billiards tables, big screen TV, snack bar, lounge, and bookstore. Other Division of Student Services offices include the Student Development Office, Student Programs, Student Activity, Veterans Counselor, Financial Aid and Scholarship Office, Associated Students of Diné College Office and the Navajo Nation Scholarship office. SUB programs include professional entertainers, talent showcases, student sponsored dances, guest speakers, and American Indian performers. Conferences, workshops, and festivals take place in the SUB activity room.

Tsaile Learning Center
The Learning Center provides academic support services for students at the Tsaile campus. The Learning Center helps students achieve their educational goal. The services provided are placement testing, tutoring, computer training/lab, online network, study area and advising. Placement Testing are required for all new students and transfers. Tutoring is conducted by peer (student) tutors on an individualized or group session. Workshops/training is provided in the areas of desktop software (e.g., work processing, spreadsheet, database, & digital images), email, Internet, and other education software. For more information, log on to http://www.dinecollege.edu.
General Education Program Requirements

Mission
The mission of the Diné College general education program is to provide a foundation in Diné history, language, and culture, and to develop the knowledge and skills needed for continued learning and successful employment. Furthermore, the program seeks to empower students to make informed judgments in a world of diverse beliefs and practices. The program aims to promote:

- Knowledge and understanding of Diné language, history, culture, values, and world view.
- Proficiency in communication, mathematics, reasoning, and information literacy.
- Foundational knowledge in the humanities, fine arts, social sciences, and natural sciences.
- Knowledge and understanding of diverse cultures.
- Self direction and social responsibility.

General Education Requirements
Each student enrolled in a Diné College degree program or planning to transfer to a four-year institution should complete a required number of academic credit hours in general education. Students enrolled in a certificate program of study are exempt from all general education requirements. The credits for the general education requirements are distributed across broad discipline areas by degree program.

The following General Education requirements will be in effect for the A.A., A.S., and A.A.S. degrees at Diné College. Humanities maximum A.A. Minimum A.S. (Meeting both AGEC requirements and New Mexico Core Competencies).

1. **Communications**
- ENG 101, 102, and ENG121 for the English Option
- NAV 211, 212 and 289 or 301 for the Navajo Option
- ENG 121 is required for New Mexico Core Competencies

2. **Social and Behavioral Sciences/Humanities**
   [The AA and AS degree differ only in this area]
   - For Dine College students earning an A.A. degree and students transferring to Arizona universities, six credits are required in the humanities/fine arts and six in the social sciences.
• New Mexico transferability requires 6-9 credits in humanities/fine arts and 6-9 credits for social sciences. 15 credits total are required in Humanities and Social Sciences for the New Mexico Common Core.
• NIS 221 may be used as the extra three credits in humanities above the six required for Dine College’s general education requirements.
• All students completing an A. A. degree must take one history class (HST) which may be used to meet either the Humanities or the Social and Behavioral Sciences requirements.

3 Mathematics
• MTH 114 (College Mathematics) or MTH 110 (College Algebra) is required for the A.A. and A. S.

4. Science
• Any two laboratory sciences are required for the A.A. and A. S. degrees.

5 A.A.S degree: Students who do not meet the requirements for the A.A. or A.S. degrees will be awarded an A.A.S. degree upon meeting the General Education requirements described above for the A.A.S. and any additional program requirements to be determined by their division and major.

Programs of study may make adjustments to include PE credits

Navajo and Indian Studies Requirements
Students must complete nine or 10 credit hours depending on their Navajo Language proficiency as a non-speaker or native speaker. Navajo and Indian Studies courses are required of all students enrolled in any degree program at Diné College. Culture, history, language, and philosophy are areas in which courses have been developed and are taught in Navajo and English. Courses are offered for two tracks of Navajo language capability: speaker and non-speaker. A placement test given by Navajo language instructors during advisement, registration, and/or during the first day of instruction determines the student’s proficiency level and placement in the appropriate course.

For native speakers of Navajo language, three credit hours in each of the following areas must be completed. For non-native speakers, one four credit language course and one three credit course each in culture and history must be completed.
• Navajo Culture: NIS 111
• Navajo History: NIS 221
• Navajo Language: NAV 101 or 102, or 211 or 212

Note on special requirements: Several courses that meet Navajo and Indian Studies requirements also fulfill the AGEC special requirements of intensive writing/critical inquiry, ethnic/race/gender awareness, and/or historical awareness and are identified under the course descriptions.
Transferring General Education Credits

Students planning to transfer to four-year institutions in Arizona or New Mexico and who wish to transfer their general education credits as a block should get a transfer checklist since some general education requirements of the other universities are different from those of Diné College. All students planning to transfer should consult with their advisor early in their coursework at Diné College to ensure that they take the appropriate general education courses.

Transfer to Arizona Universities

Diné College’s Arizona General Education Curriculum (AGEC) has been approved by the state of Arizona. Thus, students are better able to transfer general education courses taken at Diné College as a block, instead of the university evaluating each course for its transferability. Students transferring to Arizona Universities need to get the transfer checklist that applies to their major field: visit http://az.transfer.org/cas/students

The goal is to create for community college students clear and secure transfer pathways - different from, but parallel to the pathways followed by native university students - that will allow them to maximize their experience at the community college, to incorporate community college credits or degrees efficiently into university graduation requirements, and to complete baccalaureate majors in the minimum number of required credits.

Arizona General Education Curriculum (AGEC) Requirements: The 35 semester credit “block” can be completed at any Arizona community college. Because there are some differences in the mathematics and science requirements for different degrees, there are three AGEC options.

- **AGEC-A** for liberal arts (e.g., social science, fine arts, humanities) is a 35 semester-credits lower division general education curriculum block that fulfills the lower division general education requirements of liberal arts majors (e.g., social science, fine arts, humanities). The block will transfer without loss of credit from any Arizona public community college to any other Arizona public community college or university, and is for students who intend to transfer into liberal arts majors.
- **AGEC-B** for business administration is a 35 semester-credits lower division general education curriculum block that fulfills the lower division general education requirements of business majors. The block will transfer without loss of credit from any Arizona public community college to any other Arizona public community college or university, and is for students who intend to transfer into business majors.
- **AGEC-S** for science/mathematics is a 35 semester-credits lower division general education curriculum block that fulfills the lower division general education requirements of majors with more stringent mathematics and mathematics-based science requirements. The block will transfer without loss of credit from any Arizona public community college to any other Arizona public community college or university, and is for students who intend to transfer into majors with more stringent mathematics and mathematics-based science requirements.

Completion of the AGEC with a grade point average of 2.0 on a 4.0 scale guarantees your admission to the universities if you are a resident student. Non-residents must have a grade point average of 2.5 on a 4.0 scale. Completion of the AGEC also means that you will have met the lower-division general studies requirements at any of the Arizona public universities for the majors that articulate with that AGEC.

The mathematics and science requirements differ among the three forms of AGEC. The AGEC-A requires a minimum of college mathematics or college algebra. The AGEC-B requires a minimum of brief calculus. The AGEC-S requires a minimum of calculus and a minimum of university chemistry, or university physics, or university biology.
**AGEC-A for Liberal Arts Majors** - An approved AGEC-A block must contain an intensive writing and critical inquiry component and specified awareness area components. These components may be fulfilled by taking Diné College general education courses that are designated in the catalog as fulfilling intensive writing/critical inquiry (IW/CI), ethnic/race/gender awareness (ERG), and historical awareness (HA).

** History courses are included under social and behavioral sciences.
*** Science requirement: 8 credits of university chemistry, or 8 credits of university physics, or 8 credits of university biology. Choose the science appropriate for your major.
****Navajo Studies, two courses from the following three options: NAV 101 or 211, NIS 111, NIS 221.

Courses in this area should be selected to meet Special requirements, visit [http://az.transfer/cas/students](http://az.transfer/cas/students) or enhance the AGEC-S and to expand the preparation of students prior to transfer.
Transfer to New Mexico Universities
During the 2005 New Mexico Legislative session, Senate Bill 161, consistent with requirements of state law (Chapter 224 of the Laws of New Mexico, 1995 as amended) was signed into law to further enhance and facilitate the articulation of general education courses among New Mexico’s colleges and universities. In accordance with policies established by the New Mexico Higher Education Department, designated general education core courses successfully completed at any regionally accredited public institution of higher education in New Mexico are guaranteed to transfer to any New Mexico public institution.

Students who have decided on a major and/or an institution at which to complete their studies should consult with an academic advisor at that particular institution to determine the most appropriate course selections. Students enrolling for the first-year of study at a New Mexico college or university and considering possible transfer into a certificate and/or degree program at another institution are encouraged to take the courses approved for transfer during their freshman and sophomore year of study.

The core matrix of approved courses guaranteed to transfer and meet general education requirements at any New Mexico college or university can be found on the New Mexico Higher Education Department website at www.hed.state.nm.us Follow the “Colleges and Universities” link to the drop down menu and select “Transferring Credits”, then select “Core Matrix”. Courses are listed by institution, whether university or community college, under each of the five general education areas. Students may also be able to access this list by going directly to www.hed.state.nm.us/colleges/matrix.asp.

Total credits 35-39

* Humanities and fine arts: Introductory history survey and introductory philosophy, and introductory course in history, theory, or aesthetics of the arts or literature.
** Social/behavioral sciences: Introductory courses only for political science, psychology, sociology, and anthropology, and only macroeconomics or microeconomics for economics.
Academic Degrees and Certificates

Diné College is authorized to offer academic degrees for the completion of a program of study. These include the Associate of Arts, the Associate of Science, and the Associate of Applied Science degrees. Certificates are awarded for training programs in clerical fields. Each Regional Site focuses on a limited number of programs that transfer to state universities and colleges. For additional information, contact the Regional Site in your area. A student planning to transfer from Diné College to a baccalaureate degree program must exercise care in course selection to ensure that our courses will be transferable. The Registrar’s Office has course equivalency guides available to help with this analysis. The guides list the transferability of Diné College courses to other colleges and universities in Arizona and New Mexico.

Additional Degrees

Diné College graduates may obtain additional degrees by completing the program requirements as outlined in the programs of study. No substitution is allowed between program requirements. Transfer students who have already earned a degree beyond the Associate level may attend Diné College for a degree, however, the student must completes a minimum of twenty-four credit hours and meet the policy for transferring credits. The appropriate Division Academic Dean must approve all exceptions.

Arizona and New Mexico General Education Transfer Curricula

Diné College is working with the Arizona General Education Articulation Task Force, the New Mexico Commission on Higher Education, and surrounding colleges and universities to achieve full recognition of Diné College general education courses and degree programs so that all Arizona and New Mexico state universities and other institutions of higher education accept the block transfer of general education courses and associate degree courses from the College. In the meantime, Diné College courses may be evaluated on a course-by-course basis for transfer to Arizona and New Mexico state institutions. Students seeking additional information on the transferability of courses and programs should check with the Office of Records and Admissions at Tsaile or Shiprock Campus.

Catalog under Which a Student May Graduate

Students who have been admitted should follow the catalog graduation requirements in effect at the time of their initial enrollment unless they have "stopped out." In such cases, the current year catalog applies and students are expected to follow the requirements for completion of the degree. To maintain the catalog rights, students must remain in continuous attendance. Continuous attendance is defined as attendance in at least one course at Diné College for one semester in any one calendar year. Students may choose to qualify for graduation under the requirements in effect either: at the initial enrollment or during subsequent terms of continuous enrollment. Note: Students who have been academically disqualified may lose continuous attendance rights.

Graduation

To be eligible for graduation and participation in commencement exercise, students must meet the requirements for a degree or certificate as spelled out above, plus the following:

- File a completed graduation petition and degree checklist with the Office of Records and Admissions prior to the deadline.
- Pay the $25.00 non-refundable filing fee to the Cashier’s Office.
- Pay in full all outstanding accounts to the College.
- Return all Library and checked out materials.
- Complete the College’s graduate student survey.

Graduation Regalia

Appropriate college cap and gown required for the commencement exercise. Traditional attire may be worn under the gown encouraged. The cap and gown signifies the completion of a college degree program and observed as a symbol of protection way.

Graduation Requirements for an Academic Degree

- Must have been formally admitted to Diné College.
- Must have a high school diploma, a General Education Development (GED) Certificate, or special permission from the appropriate Division Academic Dean.
Must have completed all general education and degree requirements in the program of study.
Must have a “C” average for general education program requirements, and have “C” grades or better for all courses that fulfill degree program requirements.
Must earn twenty-four credit hours of Diné College coursework, which must include nine hours in program requirements.
Must pass the reading assessment or FST 131 with a “C” or better.

Graduation Requirements for a Certificate
- Must have been formally admitted to Diné College.
- Must have completed all necessary course requirements in the field of study.
- Must have “C” or better in all course work used on checklist.

Graduation Petition
Students must complete and file a Graduation Petition with the Registrar’s Office by the deadline stated in the academic calendar. A late graduation petition may be accepted after the deadline subject to a late fee and approval by the Appropriate Division Academic Dean. Petitions are evaluated by the Registrar and Academic Standards Committee and approved by the Appropriate Division Academic Dean.

Petition for Course Substitution
All students are expected to satisfy all Diné College degree requirements. However, under certain circumstances, substitutions for required courses may be necessary and appropriate. To initiate a course substitution, students should complete the “Petition for Change in Degree/Certificate Request” form, which must then be submitted to the Academic Standards Committee and the appropriate Division Academic Dean. This form can be obtained from the Office of Records and Admissions or from a Regional Director.

Reading Proficiency Requirement for Graduation
The attainment of satisfactory skill levels in reading, writing, and mathematics is necessary for graduation from Diné College with an Associate of Arts, Associate of Science, or Associate of Applied Science degree. Students graduating with a certificate are not required to meet these proficiency requirements unless specified by courses required for the certificate. General education course requirements in English (writing) and Mathematics are designed to foster development of skills in these two areas. Although reading courses do not fulfill any general education requirements, students must demonstrate, prior to graduation, at least satisfactory ability to read with comprehension in one of the following ways:

Students must earn a passing grade on the college’s reading assessment when they register for their first semester at the college or when it is offered as part of a reading course they are enrolled in.

If students do not pass the reading assessment by the time they have completed one semester of FST 131 Advanced Reading, they must either take the course again and pass it with at least a “C” or pass the reading assessment when it is given during the course.

If students who have taken FST 131 a second time and still have not passed the course or the reading assessment, they must either retake and pass FST 131 or retake and pass the reading assessment. Students may not retake the assessment more than three times per semester and must wait a minimum of eight weeks between each attempt.
Associate of Arts Degree Programs

The Associate of Arts degree is for students who wish to transfer to a four-year program of study at a college or university. A minimum of sixty-four credit hours may be earned in an academic program of study designed to meet general education and program requirements in these majors:

• Business Administration
• Computer Information Systems
• Diné Studies
• Early Childhood Education
• Elementary Education
• Fine Arts
• Liberal Arts
• Navajo Language
• Social and Behavioral Sciences
• Social Work (Shiprock Campus only)

**Business Administration**

This program provides a solid foundation for the transfer student pursuing a bachelor’s degree in business administration or business education.

Early Childhood Education
The mission of this program is to prepare students for teaching in Navajo immersion preschool programs. Understanding the fragile and sacred nature of the development of children, the program aims to prepare teachers who create safe environments for the children’s protection and nurturance, and share with parents appropriate principles of child growth and development. The program exercises the Navajo Communications Option.

Elementary Education – Transfer to the Diné Teacher Education Program

A baccalaureate degree in Elementary Education (K-8) is offered at Diné College in partnership with Arizona State University. All coursework to attain the baccalaureate degree is provided at the Tsaile Campus by the Center for Diné Teacher Education (CDTE). For maximum transferability of Diné College general education courses to this program, students should review courses with their advisor and retain a transferability checklist provided by the CDTE.

Elementary Education – Transfer to Regional Programs

Transferability of general education courses to Teacher Education programs at a regional four-year college or university varies. Diné College students desiring to take as many courses as possible at any of our campuses before transferring need to consult with their advisors. It is important to confirm that courses are transferable to the college where the baccalaureate degree will be completed. Advisement is critical and dependent upon the Teacher Education program chosen. Both the Center for Diné Teacher Education advisors and the four-year college or university advisor work together with students to confirm transferable Diné College courses.

Fine Arts

The Fine Arts program at Diné College offers a visual arts curriculum for students who expect to transfer to a four-year program. The curriculum promotes personal development in the arts. It includes studio art courses in Ceramics, Drawing, Commercial Art, Graphics, Painting, Photography, and Sculpture, as well as in Art History and Art Education. Interested students should consult the catalogs of four-year institutions that offer Bachelor of Fine Arts programs and speak with Fine Arts advisors.

**Liberal Arts**

This program offers students a more intensive investigation of ideas and practices in the arts, humanities, and social sciences than is required in the general education program, with an emphasis on critical inquiry and creative expression. It is designed to prepare students to transfer to four-year programs of study in Liberal Arts or related degree programs in the arts, humanities and social sciences. The range of courses required in the Liberal Arts program is appropriate for all students seeking a Bachelor of Arts degree in these areas.

*These courses fulfill partial requirements for New Mexico teaching endorsements in English as a Second Language, Bilingual/Bicultural Education, and Modern, Classical, and Native American Languages. Individuals seeking the Navajo Language Endorsement in New Mexico or Arizona are required to take the Navajo Language Proficiency Test. Diné College is authorized by the Navajo Nation to administer this test. In addition to the courses listed here, other courses in Navajo language studies are also offered: NAV 231, 291, 478; NIS 220, 226, 293; EDU 111, 292.

Students may choose the English Option or the Navajo Option as spelled out in General Education Program Requirements (pp. 23-24). Education majors should choose the English Option.
Social and Behavioral Sciences

The Social and Behavioral Sciences (SBS) degree is an interdisciplinary, liberal arts degree designed to introduce students to the foundations of human behavior and cultures. SBS disciplines include Anthropology, Economics, History, Political Science, Psychology, Social Work, and Sociology. The SBS A.A. programs prepare students for both transfer to a 4-year degree and provide basic training for work in the social sciences.

Program Requirements

Choice of seven
Any ANT, ECO, HST, POS, PSY, SSC, SWO, or SOC courses distributed among three different disciplines and including 9 hours of 200-level coursework

Elective Credits
7-8

General Education Requirements 1, 2

Total Credits 64

(General Education + Program credits)

1. Students must take at least one History (HST) course; this can be counted either towards the General Education Humanities/Fine Arts requirement, or towards the SBS program requirements.
2. It is highly recommended that students chose General Education and Elective courses in consultation with an SBS advisor.

Psychology Option

Program Requirements

PSY 111 Introduction to Psychology 3
PSY 213/MTH213 Statistics 4
Choice of any two 200-level Psychology classes 6
Choice of HST 101, HST 102, HST 135, HST 136 3
SBS course other than PSY or HST 3
Elective Credits 8-9

Total Credits 36-37

Social Work

This program provides skills, knowledge, and predispositions needed for becoming a technician or paraprofessional in a social welfare program. It enables transferring to a four-year college or university. Some courses are equivalent to junior and senior level courses. Students who plan to transfer to a four-year college or university should check with that institution in selecting Social Work courses.

Program Requirements

SWO 111 Social Work as a Vocation 1
SWO 211 Intro to Social Work 3
SWO 242 Comm Social Service Skills 3
SWO 243 Comm Social Service & Cult 3
SWO 250 Client Processing 3

Total Credits 64-65
Associate of Science Degree Programs

Students completing these Associate of Science Degree programs will be prepared to enter the job market in positions which require a two-year degree or to transfer to a four-year college or university. The program and General Education requirements are outlined below.

- Computer Science
- Environmental Sciences

Associate of Science Degrees with options in
  - Biology
  - General Science
  - Health Occupations

Public Health Program with options in
  - Health Education Socio-Cultural Option
  - Environmental Public Health Option

- Pre-Engineering Transfer program (not an associate degree program)

Computer Science
This program offers maximum transferability into the computer science field at a four year institution.

Environmental Sciences

This program prepares students to transfer into a Bachelors of Science degree program in Environmental Biology, Environmental Science, Environmental Management or Environmental Studies. It can also be modified to accommodate a student who desires to transfer into a Bachelors of Science degree program in other nature-science disciplines. Majors may be able to receive fellowship/internship support from the WERC program and other programs while maintaining good academic standing. (See Special Programs in catalog).

*Pre-professional students are advised to complete the CHM 151-152 sequence.
**Eight additional credits to be selected from any BIO class numbered 184 or above and ENV 101
Students selecting this option will complete a broad program in biological and related physical sciences. They will be prepared to pursue employment or further studies in fields such as zoology, botany, microbiology, ecology, wildlife biology, molecular biology, biotechnology as well as many other fields of biology according to their interests.

**General Science Option**
This option provides maximum flexibility and is appropriate for pre-professional students in pre-medicine, pre-pharmacy, pre-dental, medical technology and other professional fields. It would also be the program of choice for students interested in Geology and Chemistry.

Required General Education courses
Two science courses selected from the list below count as eight General Education requirements.

- AGR 231 or 246

**Health Occupations Option**
This option is appropriate for students who plan to enter nursing or other allied health professions. Upon completion of this degree students will be prepared to transfer to appropriate programs at four-year universities or technical schools. Math 114 is a recognized option to meet the General Education requirements for the State of Arizona and is accepted to meet the nursing requirement for a math course at NAU and ASU, an institution to which many of DC students transfer. PUH 141 is a nutrition course that meets the nutrition requirements at NAU, an institution to which many of DC students transfer. Addition of these options will provide students with additional flexibility of designing their program.

Public Health
This program is designed for working health professionals as well as those wishing to pursue a health profession that emphasizes community and population health. It promotes Navajo concepts of health and wellness. The A.S. in Public Health is either a terminal degree or transfer program to colleges and universities that offer four-year programs in public health, health education, health promotion, or community health. The program offers two options: the Health Education (Socio-Cultural) Option and the Environmental Public Health Option.

Diné College General Catalog 2007-2008 39 http://www.dinecollege.edu
Associate of Applied Science Degree Programs

The Associate of Applied Science degree prepares students for employment following graduation. They offer practical introductions to the field of work; additionally students may transfer to the University of Arizona campuses for the Bachelor of Applied Science degree. A minimum of sixty-four academic credits must be earned in specified coursework. Associate of Applied Science degrees are awarded in these programs of study:

- Business Management
- Computer Science
- Office Administration

Business Management
This program provides students with business skills for entry level positions and for starting and managing their own small businesses. It enables students to pursue further business studies and to apply business and organizational skills in their personal lives. The program features the practical, "real world" application of business concepts to challenges facing Navajos. (Program and General Education Requirements are spelled out on the following page.)

Program Requirements

Choice of one

Program Credits 45

General Education Requirements

Communications 6
Mathematics 4
Navajo/Indian Studies 9-10
Physical Education 2

Total Credits 66-67

Computer Science
This program is designed to prepare students for transfer into a four year computer degree program, for a job in the computer field, or for using computers in another field, such as teaching or science. Work with your advisor to choose the right electives for your goals.

Program Requirements Courses (18 credits)

CSC 140 Hardware Fundamentals 3
CSC 150 Programming Fundamentals 3
CSC 170 Web Fundamentals 3
CSC 190 OS Fundamentals 3
CSC 240 Networking Fundamentals 3
MTH 210 Discrete Math 3

Program Electives (6 credits)

(choose from the following)

CSC 160 Introduction to GIS 3
CSC 199 Special Topics 3
CSC 200 Object Oriented Programming 3
CSC 250 Data Structures and Algorithms 3
CSC 260 Computer Org/Architecture 3

CSC 295 Internship or Practicum 3
MTH 190 Pre-Calculus 5
MTH 191 Calculus I 5
MTH 192 Calculus II 4

Required non-CS Courses (8 credits)

(2 Lab Sciences)

Unrestricted Electives (12-13 credits)

(as needed to meet the 64 credits Graduation requirement)

Total Program Credits 44-45

General Education Requirements

Total Credits 64

(General Education + Program credits)
Office Administration

The Office Administration program provides training in business and office management skills required for positions as an administrative professional.

* If BUS 111 is waived, the student must take a three (3) hours business elective.

** Fulfilled in program requirement with BUS 142.
Certificate Program

Certificate programs offer practical training for immediate employment. They do not require general education. The courses are not designed to transfer to an upper level program of study.

Office Technology
This program provides training in entry level office positions. It also offers a foundation for the Office Administration A.A.S. program

Program Requirements
BUS 111 Keyboarding* 3
BUS 113 Note Taking 3
BUS 121 Records Management 3
BUS 124 Office Procedures 3
BUS 142 Business Math 3
BUS 143 Business English 3

BUS 214 Word Processing I 3
BUS 216 Word Processing II 3
ENG 100B Communication Workshop II 3
BUS 144 Human Relations 3
Total Credits 33

* BUS 111 may be waived if at least one year of keyboarding was completed in high school; a Business elective must be substituted.

Bachelor's Partnership Programs

Diné Teacher Education Program (B.A.)
The Diné Teacher Education Program (DTEP) is a collaborative program with Arizona State University. The program offers a Bachelor’s Degree in K-8 Elementary Education through approaches that promote Navajo philosophy, culture, history, language, and literacy. The mission of the program is to prepare individuals for responsible learning, living, and teaching according to Sa’áh Naagháí Bik’eh Hózhóón. The program aims to develop teachers with the necessary values, knowledge, skills, and confidence so that they may promote children’s academic skills and confident cultural identities in English and Navajo.

Admission criteria include:
• Completion of approximately 56 hours of appropriate and transferable coursework at the two-year level with a cumulative grade point average of 2.5 or better, including ENG 101 and 102, MTH 110, 180, and 181, two science with lab courses, NAV 211 with an average of "C" or better, and ideally by having successfully completed NAV 212 and NAV 301.
• Abilities to read and write Navajo, as demonstrated on an assessment of Navajo literacy.
• Abilities to speak, read, and write English proficiently, as demonstrated by an assessment of English, mathematics, reading, and science reasoning.
• Submission of a complete application packet.
• An interview with DTEP staff.

Detailed information about the program is available at the Center for Diné Teacher Education, Tsaile Campus. Call (928) 724-6699 or log on to http://cdte.dinecollege.edu/.
Course Information

The courses in the General Catalog are offered in any given semester. The College reserves the right to make additions or deletions to the list of offerings during the year and withdraw courses with inadequate enrollment at the beginning of each semester. Planning their programs, students should consult the course schedules that are published every semester. Course schedules contain the official list of courses offered each semester. The number following the title of each course indicates the number of credits to be awarded and designates the minimum number of required contact hours per week. Additional laboratory hours may be required and are normally designated in the course description.

Course Numbering
Courses are numbered 011 to 299. Courses from 011 to 099 are developmental courses designed to improve basic proficiency skills. Credits for these courses, however, do not count toward the sixty-four semester hours required for graduation. Courses numbered from 100 may or may not be transferable to other colleges or universities. Selected courses in Navajo language and culture numbered 300 through 400 are intended for students majoring in those areas and for teachers seeking Bilingual-Bicultural endorsements. Diné Teacher Education Program courses are numbered at the 300 to 400 levels and are for DTEP students who are majoring in Elementary Education and intending to attain a Bachelor Degree from Arizona State University. These students are admitted to the program by an Admissions Committee once per year. The courses are offered on a two-year junior/senior schedule over four semesters. The Curriculum and Instruction Program courses are numbered at the 500 and 600 levels and are for participants in this program only. All such courses are ASU courses.

Special Course Numbers

- 197 Workshop.
  Offered only as a sequel to 196. (1-3 credits).
- 198 Independent Study. Freshman level.
  Prerequisite: Approval of instructor and division chairperson. (1-3 credits).
- 199 Special Topics.
  These are courses at the freshman level and are designed to meet the special interests of students. A special topic course may be taught twice. After that, it must go through standard curriculum procedures and be assigned a regular course number. This number is intended for use in curriculum development. It may not be used to designate a course, which already exists in this catalog. (1-3 credits).
- 297 Practicum.
  Practical applications of learning. (1-3 credits).
- 298 Independent Study. Sophomore level.
  Prerequisite: approval by the instructor, the division chairperson, and the dean. (1-3 credits).
- 299 Special Topics. Sophomore level.
  These courses are designed to meet the special interests of students. The title may be used only once. This number is intended for use in curriculum development. It may not be used to designate a course, which already exists in this catalog. (1-3 credits).

Course Descriptions

Agriculture (AGR)

AGR 231   Soil Science and Irrigation (4)
Focuses on the origin, nature, and composition of soils. Examines basic biological, chemical and physical properties applicable to plant growth and nutritional development on the soil-moisture-plant relationships in irrigation methods, supply and quality of water available. Mandatory laboratory is required.

AGR 246 Introduction to Range Science (3)
An introduction to the field of range management and its relationships to other sciences. Covers concepts such as range science, range conditions, and range sites. Examines governmental and non-governmental agencies involved in range science work.

Anthropology (ANT)

ANT 111  Introduction to Cultural Anthropology (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. Introduction to the study of human cultural diversity. Includes sub-fields of anthropology, sub-disciplines and topics, historical origins, influences, key figures, theory and methods, and an introduction to the comparative study of cultures. This course emphasizes the general education special requirements of intensive writing/critical thinking and ethnic/race/gender awareness (IW/CI and ERG).

ANT 112  Human Origins & Biological Anthropology (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. A survey of evolutionary theory and its application to the study of human origins and biological evolution (IW/CI).

ANT 201 Ethnographic Methods (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. Introduces students to methods of conducting research into human cultures and provides guidance and supervision as students actually conduct research in the community on an aspect of Navajo life (IW/CI).

ANT 210 Ancient Societies in Prehistoric Times (3)
Prerequisite: ENG 101 or concurrent enrollment, or instructor’s permission. An exploration of prehistoric human societies and cultures throughout the world based on archaeological studies of the remains of ancient dwellings, ceremonial sites, and artifacts (IW/CI and HA).

ANT 215 Expressive Navajo Culture (3)
Prerequisites: NAV 101 or instructor’s permission. A survey of linguistic anthropology about the understanding of languages and cultures including language loss, and the maintenance and preservation of languages with emphasis on improving and developing communication skills and understanding of Navajo culture. Introduces and develops topics on verbal, visual dramatic, musical and cultural arts as aesthetic expressions. Taught in Navajo.

ANT 225 Indians of the United States and North America (3)
Prerequisite: ENG 101 or concurrent enrollment, or instructor’s permission. Cross listed with NIS 225. A survey of the indigenous groups of the U.S. and Canada with emphasis on changing economic and political forces that influence various tribal groups. Discussion of origins, language, arts, and habitats.

ANT 250 Principles of Archaeology (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. An introduction to the history of archaeological research and survey of concepts and methods in the study of prehistoric cultures with an emphasis on modern theories and techniques.

ANT 265 Archaeology of the Southwest (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. A survey of the prehistory of the American Southwest from the Pleistocene to the Spanish historical period. An emphasis on the prehistoric cultures of Arizona and New Mexico (IW/CI/ERG and HA).

Art History (ARH)

ARH 211 Survey of Native American Art (3)
Prerequisite: Reading proficiency plus ENG 101 or instructor’s permission. This course emphasizes the general education special requirement of ethnic/race/gender awareness (ERG).

ARH 213 Survey of World Art, Prehistoric to 1500 (3)
Prerequisite: Reading proficiency plus ENG 101 or instructor’s permission. Provides major knowledge and appreciation of Western and Eastern Art from the Prehistoric Age until the 1500s. This course emphasizes the general education special requirements of intensive writing/critical thinking and ethnic/race/gender awareness (IW/CI and ERG).
ARH 214 Survey of World Art, 1500 to Present  (3)  
Prerequisite: Reading proficiency plus ENG 101 or instructor’s permission. Provides major knowledge and appreciation of Western and Eastern Art from 1500 to contemporary art movements. This course emphasizes the general education special requirements of intensive writing/critical thinking and ethnic/race/gender awareness (IW/CI and ERG).

Astronomy (AST)

AST 100 Fundamentals of Astronomy  (4)  
Prerequisite: ENG 100B, FST 131, MTH 051, or instructor’s permission. A basic introduction to the planets, solar system, and galaxy: sun, moon, and other satellites; stars and constellations; black holes; and other celestial bodies. Relates Navajo stories of creation to the scientific view. A nighttime laboratory is required. Three hours lecture and three hours laboratory per week.

Biology (BIO)

BIO 100 Biology Concepts  (4)  
Prerequisite: FST 131, MTH 051, plus ENG 101 or instructor’s permission. A one-semester introductory course covering basic principles and concepts of biology. Methods of scientific inquiry and behavior of matter and energy in biological systems are explored. For non-majors only: will not transfer for biology majors. Three hours lecture and three hours laboratory per week.

BIO 156 Introduction Biology for Allied Health  (4)  
Prerequisite: Instructor’s permission. Study of principles and processes in plant biology with emphasis on vascular plants. Includes survey of the plant kingdom. Three hours lecture and three hours laboratory per week.

BIO 160 Introduction to Human Anatomy and Physiology  (4)  
Principles of the scientific method. A one semester introductory course that examines structure and function of the major systems of the human body. Basic principles and concepts of organization, homeostasis and control mechanisms of the system are examined. Does not meet nursing program, prerequisites.

BIO 170 Medical Terminology  (3)  
Prerequisite: Reading proficiency requirement or concurrent enrollment in FST 131. Basic tools, such as root words, prefixes and suffixes, for building an effective verbal and written biomedical vocabulary.

BIO 181 General Biology I  (4)  
Prerequisite: FST 131, MTH 100, plus ENG 101 or instructor’s permission. One year of high school chemistry or one semester of college chemistry recommended. Principles of structure and function of living things at molecular, cellular and organismic levels of organization. Three hours lecture and three hours laboratory per week.

BIO 182 General Biology I  (4)  
Prerequisite: BIO 181 or instructor’s permission. Additional principles of structure and function of living things at molecular, cellular, and organismic and higher levels of organization. Three hours lecture and three hours laboratory per week.

BIO 184 Plant Biology  (4)  
Prerequisites: Instructor’s permission. Study of principles and processes in plant biology with emphasis on vascular plants. Includes survey of the plant kingdom. Three hours lecture and three hours laboratory per week.

BIO 201 Human Anatomy and Physiology I  (4)  
Prerequisite: One semester of college level biology and one semester of college level chemistry or equivalent, or instructor’s permission. The study of structure and function of the human body. Topics include cells, tissues, integumentary system, skeletal system, muscular system and nervous system. Three hours lecture and three hours laboratory per week.

BIO 202 Human Anatomy and Physiology II  (4)  
Prerequisite: BIO 201 or instructor’s permission. Continuation of structure and function of the human body. Topics include endocrine, circulatory, respiratory, digestive, urinary, and reproductive systems. Three hours lecture and three hours laboratory per week.

BIO 205 Microbiology  (4)  
Prerequisites: One semester of college level biology or instructor’s permission. One semester of college level chemistry recommended. Study of microorganisms and their relationship to health, ecology, and related fields. Three hours lecture and four hours laboratory per week.
BIO 223 Vertebrate Zoology (4)  
Prerequisite: Minimum grade of “C” in BIO 181. A study of the evolution, systematics, diversity, distribution, ecology and major adaptations of the vertebrates.

BIO 226 Ecology (4)  
Prerequisite: ENV 101 or BIO 181 or BIO 182. Introduction to the concepts and principles of ecology including organization, function and development of ecosystems, biogeochemical cycles, population dynamics and other related topics. Three hours lecture and three hours laboratory per week which includes field studies and possible weekend field trips.

BIO 242 General Genetics (4)  
Prerequisite: One semester of college level biology or instructor’s permission. One semester of college level chemistry recommended. Basic principles and concepts of inheritance. Three hours lecture and three hours laboratory per week.

BIO 296 Scientific Research Seminar (1)  
The course is for science and engineering majors, but anyone who is interested in learning more about science-related research is also welcome. It offers a broad-based background in current scientific research. Weekly discussions on various methods used in scientific research are covered in the seminar with some hands-on research experiences.

**Business and Office Administration (BUS)**

BUS 111 Keyboarding (3)  
Includes operation and mastery of the computer keyboard. Keying alphabetical and number keys by touch, basic skills in formatting letters, memos and reports, and composing other business documents. One (1) hour laboratory required.

BUS 113 Note Taking (3)  
Studies of the principals of a current note taking method and intense practice in dictation and transcription. This course is designed for personal, educational, and professional use. One (1) hour laboratory required.

BUS 121 Records Management (3)  
Prerequisite: FST 131 or instructor’s permission. Introduction and application of basic filing methods with emphasis on management, planning, and control of records.

BUS 124 Office Procedures (3)  
Prerequisite: BUS 111, FST 130, MTH 011, or instructor’s permission. Introduction to general office duties including telephone techniques, receptionist duties, record-keeping, time management, and employment preparation.

BUS 141 Introduction to Business (3)  
Prerequisite: FST 131 or instructor’s permission. Designed to orient the student to the role of business in the American economic system. An overview of business ownership, management, marketing, data processing, human resources, accounting, finance, consumerism, and the economic environment of capitalism.

BUS 142 Business Math (3)  
Prerequisite: MTH 051. Emphasizes mathematics used in business: percentages, interest, discounts, cost markup and markdown, taxes, checking accounts, insurance, and payroll. Emphasizes proficient use of the calculator.

BUS 143 Business English (3)  
Application of basic grammar and sentence structure used in the business world.

BUS 144 Human Relations (3)  
Cross listed with FST 144. Examination and application of basic interpersonal communication skills. Investigation and examination of attitudes, behavior, and cultural influences that affect job and school performance. Offers structured situations in which to explore interpersonal relationships and communication skills. The course is open to students in education, the health fields, and all others who wish to explore the dynamics of getting along with people.

BUS 152 Fundamentals of Accounting (3)  
Prerequisite: MTH 011 or instructor’s permission. An introduction to accounting fundamentals. Includes journalizing, posting, worksheets, financial reports, and data processing for accounting. One (1) hour laboratory required.

BUS 204 Business Law (3)  
Prerequisite: FST 131 or instructor’s permission. Introduction to law and the legal process as it relates to business transactions including contracts, sales, commercial paper and secured transactions. Includes discussions of business ethics.
BUS 211 Business Internship (3)  Provides a practical learning experience with an employer in a career/field that the college student is studying or exploring.

BUS 214 Word Processing I (3)  Prerequisite: BUS 111, FST 130, MTH 011 or instructor’s permission. An introduction to word processing. Includes application of the basic functions of the word processor. One hour lab required.

BUS 216 Word Processing II (3)  Prerequisite: BUS 214 or instructor’s permission. A continuation of Word Processing I. Applies basic and advanced functions of word processing. One hour laboratory required.

BUS 240 Personal Finance (3)  Prerequisite: MTH 051. Creates an awareness of personal money management. Particular emphasis on budgeting, borrowing, purchasing, investing, insurance, and other financial planning.

BUS 242 Small Business Management (3)  Prerequisite: BUS 152 or instructor’s permission. An overview of basic management principles, financing, accounting, and legal requirements encountered by modern small businesses. Stresses characteristics of successful business operations and incorporates the uniqueness of business enterprises on the Navajo Nation.

BUS 243 Business Communication (3)  Prerequisite: BUS 111, BUS 143, ENG 100B or 101, and. Emphasizes the importance of and skills in oral and written communication in business, and gives special attention to proofreading and mechanics of grammar.

BUS 246 Principles of Management (3)  Introduces vital aspects of supervisory management. Gives an overview of skills, functions, communications, employee problems, productivity management, and legal concerns related to supervisory tasks.

BUS 251 Principles of Accounting I (3)  Prerequisite: BUS 152 or instructor’s permission. Introduction to the theory and practice of accounting in sole proprietorships, partnerships, and corporations. Emphasis on the accounting cycle, periodic reporting, receivables, payables, inventories, and accounting systems. One hour laboratory required.

BUS 252 Principles of Accounting II (3)  Prerequisite: BUS 251. A continuation of BUS 251 with emphasis on corporations, taxes, investments, and managerial approaches for decision-making. One hour laboratory required.

BUS 254 Microcomputing Accounting (3)  Prerequisite: BUS 251 or Instructor’s permission. Fundamentals of commercial accounting programs used on microcomputers. Includes installation and use of the general ledger, accounts receivable, accounts payable, and payroll.

BUS 260 Finance (3)  Prerequisite: BUS 251 and MTH 110 or concurrent. An orientation to Business Finances as used in modern businesses and their relationship to other business functions; internal financial activities; sources of funds and the firm’s involvement with money and capital markets. Review of stock exchanges, mutual funds and other capital investment.

BUS 272 Marketing (3)  An orientation to basic marketing concepts and practices. Topics include the impact of external forces on marketing decisions especially marketing on the Internet, marketing strategies, marketing aspects of business ethics, and social responsibilities and global marketing.

BUS 280 Computers in Business (3)  Prerequisite: Basic typing skills or instructor’s permission. Use of microcomputers in the business world. Emphasizes use of software for processing business data, such as word processing, spreadsheets, database, and power-point. One-hour laboratory required.

Chemistry (CHM)

CHM 130 Fundamental Chemistry (4)  Prerequisite: ENG 100B, FST 131, and MTH 051 or instructor’s permission. A survey of modern chemistry and the relationship of chemical principles to familiar aspects of living, including topics relevant to Navajo culture. Discusses theories of atoms, molecules, chemical bonds, chemical reactivity, solutions, and the chemical basis of life. Suitable for allied health and education majors. Three hours of lecture and three hours of laboratory per week.

CHM 151 General Chemistry I (5)  Prerequisite: High school chemistry plus MTH 110 or equivalent or instructor’s permission. Fundamental concepts of chemistry with an emphasis on
theoretical and physical principles; atomic and molecular structure and theory; properties of gases, liquids, solids, and solutions; and kinetics and equilibrium. Laboratory experiments illustrate chemical principles, some of which are quantitative in nature, involving titrmetric and gravimetric methods. Four hours of lecture and three hours of laboratory per week. Note: Course for pre-professional, engineering and chemistry majors.

CHM 152 General Chemistry II (5)
Prerequisite: CHM 151 or equivalent. A continuation of CHM 151. Topics include physical states of matter, equations of state, phase transformations, solutions and colloids, chemical thermodynamics and kinetics, electrochemistry, ionic equilibria, and instrumental analysis. Four hours of lecture and three hours of laboratory per week.

CHM 220 Analytical Chemistry (4)
Prerequisite: Grade of B or better in MTH 100 and CHM 152 or their equivalents. Theory and technique of volumetric and gravimetric chemical analysis. The course's laboratory emphasizes rigorous experimental measurements, instrumental methods in chemical analysis, and the evaluation of data.

CHM 230 Fundamental Organic Chemistry (4)
Prerequisite: CHM 130 or equivalent or instructor’s permission. Survey of modern organic chemistry. Topics include structure, properties, and reactions of the various classes of organic chemicals, including saturated and unsaturated hydrocarbons, alcohols, halides, carbonyls and amines. Introduces reaction mechanisms. Examples include simple synthesis and biochemical reactions. For allied health and nursing majors. Three hours lecture and three hours laboratory per week.

CHM 235 General Organic Chemistry I (4)
Prerequisite: CHM 152 or instructor’s permission. Study of the structure, physical properties, synthesis, and typical reactions of the various series of aliphatic, alicyclic, and aromatic compounds, with attention to reaction mechanisms and applications to living systems. Three hours lecture and three hours laboratory per week. Note: For pre-professional, engineering and chemistry majors.

CHM 236 General Organic Chemistry II (4)
Prerequisite: CHM 235. Continuation of CHM 235. Spectroscopic applications in organic chemistry; condensation reactions of carbonyl compounds, rearrangement reactions, and mechanisms; chemistry of fats, amines, proteins, and carbohydrates. Three hours lecture and three hours laboratory per week.

CHM 295 University Organic Chemistry (4)
Prerequisite: CHM 152. Covers the structure, physical properties, synthesis, and typical reactions of the various series of aliphatic, acyclic, and aromatic compounds with emphasis on reaction mechanisms. Three hours lecture and one hour of workshop weekly. Note: For pre-professional, engineering, and chemistry majors.

Cooperative Education (COE)

COE 211 Cooperative Education I (3-9)
Provides practical learning experiences with employers in a career and field that the college student is exploring.

COE 212 Cooperative Education II (3-9)
Job assignments that follow COE 211 that offer understanding of a career and field that the college student is exploring. Acquaints students with unfamiliar career possibilities. Learning goals are developed that reflect this analysis.

Computer Information Systems (CIS)

CIS 100 Windows (1)
Mini-course introduction to the Windows Operating Systems for personal computers including optimization of file organization, personalization of the desktop, basic mouse operations, and program installation.

CIS 101 Spreadsheet (2)
Beginning to intermediate use of Microsoft Excel. Students will create worksheets for budgets, financial planning and forecasting, personal finance including multiple worksheets as well as create charts and work with the database function of Excel.

CIS 102 Data-base Management (1)

CIS 103 Computer Graphics (1)
Mini-course introduction to Computer Graphics Program, business graphics with spreadsheet programs, free-hand drawing with mouse, editing graphics screens, transferring graphics between programs, and printing graphics. Students use microcomputers for program exercises throughout course.
CIS 106 Introduction to the Internet (1)  
Mini-course introduction to the Internet. Searching for academically and culturally relevant materials with a web browser and a search engine. Students also learn how to set up and use e-mail. Each student develops a home page and uses a microcomputer for class exercises throughout the course.

CIS 111 Introduction to Computers (3)  
Prerequisite: ENG 100B, FST 131, and MTH 051. Concepts of information systems and computer terminology; introduction to and hands-on experience with state-of-the-art computing resources—hardware, software, and networking; and introduction to a general-purpose programming language. Two hours of laboratory per week required.

Computer Science (CSC)

CSC 140 Hardware Fundamentals (3)  
Prerequisites: None. Introduction to electronics as it applies to computers. Theory of computer hardware and how programs are implemented in that hardware. Practical skills of maintaining, upgrading and building computers.

CSC 150 Programming Fundamentals (3)  
Prerequisite: MTH 110. This is the first programming course for CS majors - a re-introduction to computers from a programmer’s perspective. Topics include: history of computers; social and ethical aspects of computers; working with files and folders; fundamentals of procedural programming (data types, variables, control structures, functions and arrays, input/output, built-ins); the use of pseudocode; high-level languages (interpreted and compiled); the basics of software development. Three hours lecture and two hours laboratory per week.

CSC 160 Introduction to Geographic Information System (3)  
Introduction to Geographic Information System (GIS) software using the ARC/INFO program. Covers GIS planning methods and the uses and analysis of geographic and attribute data. Requires applications of the GIS for projects. Includes an introduction to INFO data commands and the ARCVIEW display program. Mandatory two-hour lab per week and plus a team project.

CSC 170 Web Fundamentals (3)  
Prerequisite: ENG 100B. Web fundamentals for CS majors. How to create structured documents and share them on a network. HTTP, HTML, XML and CSS. Media on the web: images; sound; animation and text encodings. Security and usability. Integrating programs and data-bases with web documents. Three hours lecture and two hours laboratory per week.

CSC 190 OS FUNDAMENTALS (3)  
Prerequisite: CSC 150 or CSC 170. Fundamentals operating systems – theory and system administration using Linux or other POSIX complaint OS.

CSC 195 Special Topics (3)  
Prerequisites: Consent of instructor & department approval. This course will cover special topics not covered in the other courses in the curriculum. The exact content will depend on student interest and on the availability and interests of instructors. This course can be repeated for credit if the topics differ.

CSC 200 Object Oriented Programming (3)  
Prerequisite: CSC 150. This course assumes that students are familiar with the basics of procedural programming. Students should already be able to write, from scratch, simple programs that use variables, conditionals, loops and arrays. The course will begin with a preview of this material. Then students will be introduced to the basics of object-oriented programming. Key notions are classes, objects, properties, and methods. Three hours lecture and two hours laboratory per week.

CSC 210 Systems Analysis and Design (3)  
Prerequisite: CSC 150. Principles of information systems analysis and design using high-level development tools. Covers flow diagrams, pert charts, and gantt charts. Requires a case study (small group) project. Three hours lecture and two hours laboratory per week.

CSC 240 Network Fundamentals (3)  

CSC 250 Data Structures and Algorithms (3)  
Prerequisite: CSC 150 and CSC 200. This course covers fundamental data structures and the algorithms used to process them. The data structures include arrays, linked lists, stacks, queues, lists, dictionaries and trees. The algorithms include recursion and various search and sorting techniques. Three hours lecture and two hours laboratory per week.
CSC 260 Computer Organization & Architecture (3)  
Prerequisite: CSC 150 and MTH 210. Basic concept of computer organization and architecture: how digital logic is implemented on hardware; data representation; circuits; assembly language; I/O; system software; hardware components. Three hours lecture and two hours laboratory per week.

CSC 295 Internship or Practicum (3)  
Prerequisites: Department approval and at least 3 semesters of Computer Science. The student will work with CS faculty to customize an internship or practicum that will tie together, and go beyond, what the student has learned in the rest of the courses. This course would normally be taken in the students last semester. The student should have completed most of the required courses.

**Diné Educational Philosophy (DEP)**

DEP 294 Diné Educational Philosophy I (3)  
Introduces faculty to SNBH teachings of the Diné knowledge and living systems. Relates them to curricula, pedagogy, and academic life in higher educational learning. Allows faculty to learn the basic Diné Educational Philosophy in using the traditional and Western curriculum to advance quality student learning.

DEP 295 Diné Educational Philosophy II (3)  
Prerequisite: DEP 294. This course is designed to develop intermediate-level knowledge for faculty in using SNBH components to advance quality student learning. Facilitates application process for successful integration into the course content.

**Early Childhood Education (ECE)**

ECE 108 Field Experience I (2)  
Prerequisite: ECE 111 and another ECE program core course. This course is designed to assist students in applying content from coursework to the daily experiences of teaching in an early childhood setting. Students are expected to apply theory, materials, and research discussed in the semester’s coursework, assess applicability, and critique for best practices in teaching and learning for young children (birth through eight years old).

ECE 110 Field Experience II (2)  
Prerequisite: Must be taken as an exit course during the last semester of completing the required ECE program core courses. This course is designed to assist students in applying content from coursework to the daily experiences of teaching in an early childhood setting. Students are expected to apply theory, materials, and research discussed in the semester’s coursework, assess applicability, and critique for best practices in teaching and learning for young children (birth through eight years old).

ECE 111 Introduction to Early Childhood Education (3)  
This is a survey course that covers major concepts across basic areas of study in early childhood education. Focuses on curriculum development in all areas, including literacy, numeracy, the arts, health, science, social skills, and adaptive learning for children, birth through eight. Integrates curriculum across content areas, using home language, experiences, and cultural values. Taught in Navajo.

ECE 116 Language and Cognitive Development (3)  
Prerequisite: ECE 111. This course covers the development of language and mental growth in children from birth to age eight. Focuses on the use of a variety of language strategies during adult-child interactions and facilitates dialogue between and among children to develop expressive language and thought. Develops knowledge of language assessment procedures and instruments to determine each child’s language strength. Taught in Navajo.

ECE 220 Creative Arts for Young Children (3)  
Prerequisite: ECE 111. This course focuses on the central role that the creative arts play as an overall design element for early childhood care programs. Students learn to use drawing, painting, sculpture, manipulative, drama, music, dance, and other artistic modalities in planning the activities of children. Through the arts, guidance strategies are explored that foster responsibility, autonomy, self-reliance and positive social interactions within the cultural framework of the child. Taught in Navajo.

ECE 225 Child Growth and Development (3)  
Prerequisite: ECE 111. This course covers main theories and research about the physical and psychological development of young children. It also covers strategies for parents and teachers to encourage healthy development. Taught in English.

ECE 235 K’čé, Ádaa Ákoohwindzin, Social Development, and Community (3)  
Prerequisite: ECE 111 or instructor’s permission. This course examines the structure of healthy Navajo communities by focusing on clan and extended family systems. Structures are then expanded and related to other institutional support systems that provide for the welfare of children and their families. Taught in Navajo.
ECE 245 Wellness and Special Needs for Young Children (4)
Prerequisite: ECE 111. This course focuses on the health, nutrition, and safety of young children. Students learn about basic safety and illness prevention. The course also covers inclusion of children with special needs. It requires throughout the semester application of the material in field experiences at a childcare center. Taught in English and Navajo.

Economics (ECO)

ECO 111 Introduction to Economics (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. An introduction to the study of capitalism, including macro and micro perspectives. Draws comparisons to other forms of economic organizations including those of the Navajo.

ECO 200 Principles of Macroeconomics (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. An introductory course on the macro analysis of the capitalist system. Topics include national income accounting, aggregate demand and supply, inflation, unemployment, and monetary and fiscal policies. Topics relate to the productive capacity of the Navajo economy, international economics, and current economic issues. The course emphasizes the general education special requirements of intensive writing/critical thinking and ethnic/race/gender awareness (IW/CI and ERG).

ECO 201 Principles of Microeconomics (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. An introductory course on the microanalysis of the capitalist system. Topics include utility theory and consumer choice, the theory of the firm, costs and producer choice, supply, demand and price determination, perfect and imperfect markets, business regulations, markets for resources, and the determination of wage rates. The course emphasizes the general education special requirements of intensive writing/critical thinking and ethnic/race/gender awareness (IW/CI and ERG).

ECO 262 Navajo Resources and Economic Development (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. This is a basic economic development course. It treats the economic development of less developed countries. Topics include theories of economic development: Marxist Theory, Classical Theory, Rostows Takeoff Theory, savings, investment and capital accumulation, population growth and food supply, and the importance of Navajo resources in the economic development on the Navajo Nation.

Education (EDU)

EDU 111 Foundations of Education (3)
Prerequisite: FST 131 and ENG 100B. Foundations of Education is a survey course for students who are considering education as a profession. The course covers the philosophical, socio-cultural, historical and legal, foundations of education. Comparisons are made among various educational K-8 systems, with special attention to Navajo Nation schools and indigenous cultures. The organization of schools is examined.

EDU 238 Children's Literature (3)
Prerequisite: ENG 101. This course provides an overview of prose and poetry appropriate for K-8 environment with special attention to Navajo Nation and indigenous cultures. Emphasis is placed on understanding the purpose and content of literary works to encourage literacy and critical thinking. Ways to promote the development and assessment of reading skills are examined.

EDU 240 Introduction to Special Education (3)
Prerequisite: ENG 101; recommended EDU 111. This course includes an overview of the history, current trends, and future directions of special education. The course covers federal legislation and policies, learning about disabling conditions, classroom integration/inclusion, and the social issues.

EDU 290 Methods and Materials in Navajo Education (3)
Prerequisite: FST 131 and ENG 100B. This course presents bilingual-bicultural K-8 education teaching and learning, theories, and policies for indigenous students with special attention to Navajo Nation schools. It provides opportunities for students to better understand the roles and responsibilities of an elementary education teacher. Students assess the quality and usefulness of methods and materials.

EDU 292 Bilingual-Bicultural Education and Curriculum Critique (3)
Prerequisite: FST 131 and ENG 100B. This course presents bilingual-bicultural K-8 education teaching and learning, theories, and policies for indigenous students with special attention to Navajo Nation schools. It provides opportunities for students to better understand bilingual-bicultural issues through analysis of programs as well as through experiences in schools and communities.
EDU 293 Native American Music for Teachers (3)
Cross listed with NIS 293. Focuses on music, dance repertoire, and teaching methods for use in the classroom. Discusses traditional tribal styles, instruments, and social/ceremonial contexts with special emphasis on the Navajo Nation and other Southwestern tribes.

Engineering (EGR)

EGR 111 Introduction to Engineering (2)
Prerequisite: MTH 100 or equivalent. A broad survey of the various fields of engineering and an in-depth look at the disciplines of study needed to pursue a career in engineering. Particular attention to measurement and calculation with an introduction to computing and the BASIC programming language.

EGR 116 Plane Surveying (2)
Prerequisite: MTH 111. Instruction in the usage of the engineer’s tape, transit, level, and methods of recording data in note form. Includes transverse layouts and computation.

EGR 121 Technical Drafting (3)
Covers drafting and the preparation of drawings.

EGR 141 Solar and Alternative Energies (3)
Defines energy and discusses the historical development and use of natural energies, the energy crisis, our energy-dependent society, and alternate sources with a major focus on solar energy.

EGR 217 Engineering Statistics (3)
Prerequisite: MTH 111, MTH 191, and PHY 121. An introduction to the equilibrium of particles and rigid bodies. Also discusses friction, centroids, moments of inertia, trusses, and virtual work.

EGR 218 Engineering Dynamics (3)
Prerequisite: EGR 217 and MTH 220. Topics include kinematics and dynamics of particles and rigid bodies, concepts of energy and work, impulse, and momentum.

English (ENG)

ENG 100A Communication Workshop I (3)
Prerequisite: FST 133 or placement test. This course develops writing ability through writing process strategies and work on basic grammar skills. Narrative and descriptive writing are emphasized. (IP grade applicable.)

ENG 100B Communication Workshop II (3)
Prerequisite: ENG 100A or placement test. Using a mixture of teaching strategies, this course develops the ability to communicate in writing. Elements of expository prose are emphasized. Basic grammar and sentence structures are covered as necessary. (IP grade applicable.)

ENG 101 Freshman English I (3)
Prerequisite: ENG 100B or placement test. Emphasizes critical reading and writing as a method to develop necessary college level communication skills. One guided research paper is required.

ENG 102 Freshman English II (3)
Prerequisite: ENG 101. Offers extended work on writing essays while introducing the student to literature. Encourages development of critical and analytical skills through reading, writing, and discussion. Covers different literacy genres. Continues research writing, and requires one research paper.

ENG 121 Speech Communication (3)
Prerequisite: ENG 101 and FST 131. A study of principles, cultural dimensions, and techniques of public speaking. Students prepare and present speeches.

ENG 131 Reading and Writing for Special Purposes (3)
Prerequisite: FST 131 and ENG 100B. This course introduces students to techniques of reading and analyzing materials. Addresses topics of current public interest. Emphasizes reading, note taking, summarizing, and reporting.

ENG 180 Technical Writing (3)
Prerequisite: ENG 101. Instruction in writing and analysis of proposals, technical descriptions and articles, manuals and reports, and business letters.

ENG 212 Creative Writing: Poetry (3)
Prerequisite: ENG 101 or concurrent enrollment. An introduction to techniques of writing poetry. Introduces forms, elements of poetry, and the creative writing process.

ENG 213 Creative Writing: Short Fiction (3)
Prerequisite: ENG 101 or concurrent enrollment. This course is an introduction to the writing of short fiction. Emphasizes the elements of short fiction.

ENG 231 Introduction to Literature (3)
Prerequisite: ENG 101 or instructor’s permission and FST 131 or fulfillment of Reading Proficiency Requirement. Study of poetry, short stories, drama,
essays, and novels from a variety of cultural perspectives. The course emphasizes the general education special requirements of intensive writing/critical thinking and ethnic/race/gender awareness (IW/CI and ERG).

ENG 233 Introduction to Native American Literature (3)  
Prerequisite: ENG 101 or instructor’s permission and FST 131 or fulfillment of Reading Proficiency Requirement. A survey of American Indian literature with emphasis on contemporary writers and the oral tradition. The course emphasizes the general education special requirements of intensive writing/critical thinking and ethnic/race/gender awareness (IW/CI and ERG).

ENG 234 Literature of the Southwest (3)  
Prerequisite: ENG 101 or instructor’s permission; FST 131 or fulfillment of Reading Proficiency Requirement. A survey of selected works by Southwest authors in a variety of genres to promote appreciation and understanding of this multicultural region. This course emphasizes the general education special requirements of intensive writing/critical thinking and ethnic/race/gender awareness (IW/CI and ERG).

ENG 241 Media Journalism (4)  
Prerequisite: Reading Proficiency plus ENG 101 or instructor’s permission. This is an inter-disciplinary course designed to help students survey the various fields of print media journalism and to acquire the skills needed to recognize, develop, and write different kinds of news stories. Visual reporting and advertising are explored, as are the ethics of the field. Students produce a campus newsletter or newspaper that reflects the journalistic skills acquired in the class and is printed in both Navajo and English.

Environmental Science and Technology (ENV) 

ENV 101 Introduction to Environmental Science (3)  
Prerequisite: MTH 011 and ENG 101. This course presents basic information for understanding environmental problems and making good personal choices. It surveys sources, types, and effects of pollutants on the environment and human health as well as ways to control pollutants and to mitigate pollutant damage. Special emphasis is on the local environment and public health issues with the incorporation of Navajo views of the environment, science, and health. Students research contemporary issues of health, diet, consumer products, and resource management.

ENV 202 Introduction to Environmental Engineering (4)  
Prerequisite: CHM 130 or above plus MTH 100 or above. Introductory course in controlling pollution. Basics are presented on water supply and wastewater treatment, solid and hazardous waste management, and air pollution control. Environmental laws and regulations are also covered.

ENV 204 Environmental Planning and Management (3)  
Prerequisite: ENV 101 or instructor’s permission. Principles of environmental planning for self and community with emphasis on issues within the Navajo Nation. Students practice setting goals and objectives; developing timelines; reviewing planning documents, policies, and laws; analyzing historical patterns of development; becoming familiar with soil surveys, socioeconomic data, and other technical data used in planning; and planning at least one project toward maintaining balance in the environment. Integrates Diné concepts of planning.

ENV 210 Solid Waste Management (4)  
Prerequisite: CHM 130 or above plus MTH 110 or above. Introduction to the planning, design and operation of solid waste collection and disposal facilities, resource recovery, and waste minimization. Special emphasis on municipal solid waste on American Indian reservations.

ENV 214 Water and Wastewater Technology (4)  
Prerequisite: CHM 130 or above plus MTH 100 or above. Introduction to the planning, design, and operation of a public drinking water treatment and supply facility, as well as a wastewater treatment and disposal facility.

ENV 218 Water Resources Technology (4)  
Prerequisite: GLG 101 and MTH 110 or above. Introduction to hydrology, water law, water resources management, and planning with special focus on the Navajo Nation.

ENV 230 Environmental Sampling and Monitoring (4)  
Prerequisite: ENV 101 and MTH 213. The course introduces methods and techniques in environmental sampling and monitoring for water, air and solids.

ENV 297 Practicum in Environmental Science (3)  
Prerequisite: Instructor’s permission. Provides a practical learning experience in environmental
science. Credit is awarded upon demonstrated achievement of educational goals agreed upon between student and instructor. Field research will be required.

**Fine Arts (FA)**

FA 112 Basic Design (3) Creative, imaginative, and perceptual problem-solving using design, color theory, and critical evaluation. Covers two- and three-dimensional design projects for intuitive thinking and problem solving. Two hours lecture and three hours laboratory per week.

FA 115 Beginning Drawing (3) Developing basic concepts, graphic sensitivity, and compositional skills in drawing. Two hours lecture and three hours laboratory per week.

FA 120 Beginning Ceramics (3) Explorations in coil, slab, mold, and wheel methods. Introduction to firing and glazing techniques. Two hours lecture and three hours laboratory per week.

FA 121 Beginning Photography (3) An introductory course in photography as an art medium. Includes operating a camera, developing black and white film, and enlarging negatives to make prints. Includes analysis of aesthetics and the historical background of photography during student critiques. Two hours lecture and three hours of laboratory per week.

FA 131 Beginning Sculpture (3) Introduction to media, materials, methods, and techniques in sculpture as an art medium. Emphasis on design. Two hours lecture and three hours laboratory per week.

FA 180 Introduction to Commercial Art (3) Introduction to principles and processes of commercial art including graphic design, layout, lettering, typography, illustration, and portfolio preparation. Two hours lecture and three hours laboratory per week.

FA 181 Digital Image Editing (3) Prerequisite: Computer literacy, FA 112, FA 180, or instructor permission. An introductory course in the artistic creation and manipulation of digital images. Students are introduced to the concepts, techniques, and tools of Adobe Photoshop to create, edit, and manipulate images. Artistic aspects of the medium are a focus of the course, using the elements and principles of design. Students are guided by a step-by-step tutorial. Two hours of lecture and three hours of laboratory per week.

FA 190 Beginning Painting (3) Prerequisite: FA 112. An introduction to practical applications of painting, stressing the personal exploration of ideas. Covers fundamental concepts such as functional color theory and atmospheric perspective. Two hours lecture and three hours laboratory per week.

FA 215 Intermediate Drawing (3) Prerequisite: FA 115. A second-semester course on drawing as an art medium. Emphasis on figures. Two hours lecture and three hours laboratory per week.

FA 220 Expressive Arts Therapy (3) Cross listed with CHD 220 and PSY 220. Provides an overview, experiential course for individuals in the counseling and behavioral health fields. Visual arts, music/sound, dance/movement, play therapy, psychodrama, and bioenergetics are examined as tools of therapy.

FA 221 Intermediate Photography (3) Prerequisite: FA 121 or instructor’s permission. A second-semester course in photography as an art medium. Refines camera and darkroom techniques. Includes critique of photographs, the historical background of photography, photographic vision, and the aesthetics of photography to help students develop individual styles. Two hours lecture and three hours laboratory per week.

FA 227 Art for Teachers (3) Methods and theories of art education for early childhood and elementary school, including art appreciation and art history.

FA 231 Intermediate Sculpture (3) Prerequisite: FA 131 or instructor’s permission. A second-semester course in sculpture as an art medium. Further development in the application of sculptural concepts and physical processes. Encourages independent initiatives. Two hours lecture and three hours laboratory per week.

FA 245 Life Drawing (3) Prerequisites: FA 115 and FA 116. An introduction to the development of skills in drawing the basic forms and gestures of the human figure. Two hours lecture and three hours laboratory per week.
FA 290 Intermediate Painting (3)
Prerequisites: FA 190 or equivalent. A second-semester course in painting as an art medium. Further application of painting concepts and physical processes. Encourages independent initiative for developing further expertise in painting. Two hours lecture and three hours laboratory per week.

Foundation Studies (FST)

FST 100 College Success Skills (3)
Prerequisite: Placement Tests or instructor’s permission. Offers an opportunity for students to improve their study habits and learn basic study skills necessary for success in college. Includes practice in note taking, test taking skills, time management and use of library. Practical application of study skills emphasized. Explores variety of resources available to college students. Begins career options exploration.

FST 101 Language Skills (3)
Introduces beginning students to the scope of the discipline of communication. Offers the development of skills, attitudes and understandings that aid the individual in various communication situations. Offers students an opportunity to improve writing skills, making presentations, participating in discussion and working in groups. Focuses on active listening and speaking techniques, as well as writing skills.

FST 129 Foundations of Reading I (3)
Prerequisite: Placement test. Introduces a variety of reading skills and strategies, focusing on literal comprehension. Reading selections reflect pre-college-level reading demands. Readings include topics related to Diné life and culture. (IP grade applicable.)

FST 130 Foundations of Reading II (3)
Prerequisite: FST 129 or placement test. Reinforces a variety of reading skills and strategies. Reading selections reflect pre-college-level reading demands. Readings include topics related to Diné life and culture. (IP grade applicable.)

FST 131 Advanced Reading (3)
Prerequisite: FST 130 or placement test. Stresses higher order cognitive skills through critical reading and comprehension. Competencies to be mastered include expressing implied main ideas, recognizing biased language, distinguishing between fact and opinion, locating supporting evidence and utilizing a reading/study method. Emphasis placed on Native American reading materials. (IP grade applicable.)

FST 133 Applied Communications I (3)
Prerequisite: Placement test. Designed for students who need to master basic communications skills necessary for college courses and/or their chosen vocational fields. Emphasizes basic English grammar and sentence structure. (IP grade applicable.)

FST 141 Peer Tutor Training (3)
Prerequisite: Instructor’s permission. Designed to train students to help other students with academic problems. Includes tutoring techniques, interpersonal relations, decision making and study skills. Students wishing to take this course must excel in at least one academic subject. Students may be able to begin tutoring during the first semester.

FST 142 Peer Tutor Practicum (3)
Prerequisite: FST 141 or instructor’s permission. A seminar course designed to expand the peer tutor’s knowledge and experience through tutoring and analysis of tutoring problems. Guest speakers may explore pertinent topics and students will keep a log of their tutoring experiences and reactions.

FST 144 Human Relations (3)
Cross listed with BUS 144. Examination and application of basic interpersonal communication skills. Investigation and examination of attitudes, behavior, and cultural influences that affect job and school performance. Offers structured situations in which to explore interpersonal relationships and communication skills. The course is open to students in education, the health fields, and all others who wish to explore the dynamics of getting along with people. Students in the AAS/Office Administration, AAS/Business Management and Office Technology Certificate Programs should take the course as BUS 144.

Geology (GLG)

GLG 101 Indigenous Physical Geology (4)
Prerequisite: ENG 100B, FST 131, and MTH 051 or instructor’s permission. High school chemistry or physics is recommended. Basic principles of geology and applications of chemistry and physics to geological problems with an emphasis on the geology of the Navajo Nation and geologic topics of significance to Navajo people. Rocks, minerals, regional landforms and structures, Earth processes, Earth systems, and geologic time. Three hours lecture and three hours laboratory. Includes field studies and possible weekend fieldtrips.
GLG 102 Historical Geology (4)
Prerequisite: GLG 101. Application of geologic principles to the interpretation of Earth history and the evolution of life. Three hours lecture and three hours laboratory. Includes field studies and possible weekend field trips.

GLG 105 Introduction to Planetary Science (4)
Prerequisite: ENG 100B, FST 131, and MTH 051. High-school chemistry or physics is recommended. Solar system objects and their geologic evolution including interiors, surfaces, atmospheres, and dynamic processes of change. Some weekend fieldtrips may be required. Three hours lecture and three hours laboratory.

GLG 203 Environmental Geology (4)
Prerequisite: GLG 101, CHM 151, and MTH 110 or above. A quantitative study of environmental problems involving solid-Earth systems and human interactions. Case studies concerning the Navajo Nation and environs in the arid Southwest are given special emphasis. Three hours lecture and one three-hour laboratory per week. Some weekend field trips may be required.

GLG 229 Field and Laboratory Geology for Teachers (3)
Prerequisite: One college level science course. A modular (project-oriented) course in the principles of geology and methods of geology education, for practicing K-12 teachers. Provides hands-on field and lab experience to foster creative and technical skills that teachers require to develop student-centered lessons. Examples and activities are drawn from the Navajo land and environment, Diné educational philosophy, and the National Science Education Standards. Graduate-level credit may be arranged through a cooperating university. Some weekend fieldtrips may be requested.

Health Education (HEE)

HEE 110 Introduction to Wellness (3)
An introductory class in wellness that covers health, cultural diversity, relationships, sexuality, stress management, substance use and abuse, nutrition, mental health, lifestyles, aging and death, alcoholism, communicable and chronic diseases, environmental health, and health care systems.

HEE 111 Personal and Community Health (3)
Explores how to achieve, maintain, and promote wellness. Also covers prevention and control of diseases, nutrition, consumer health, and ecology.

HEE 112 First Aid/CPR (3)
Techniques in basic first aid and CPR. Students receive certification upon successful completion of the course.

History (HST)

HST 101 World Civilization I (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. A survey of Middle Eastern, Asian, Western, Native American, and African history to the discovery of the Americas by Europeans. The course emphasizes general education special requirements in intensive writing/critical thinking, and ethnic/race/gender, and historical awareness (IW/CI, ERG, HA).

HST 102 World Civilization II (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. A survey of Middle Eastern, Asian, Western, Native American, and African history since the discovery of the Americas by Europeans to the present. This course emphasizes general education special requirements of intensive writing/critical thinking, and ethnic/race/gender, and historical awareness (IW/CI ERG, and HA).

HST 135 American History: Prehistory to 1865 (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. A survey of the American experience from the period of European exploration to the end of the Civil War. This course emphasizes general education special requirements of intensive writing/critical thinking, and ethnic/race/gender, and historical awareness (IW/CI, ERG, and HA).

HST 136 American History: 1865 to Present (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. A survey of the American experience from the conclusion of the Civil War to the present. The course emphasizes general education special requirements of intensive writing/critical thinking, and ethnic/race/gender, and historical awareness (IW/CI, ERG, and HA).

HST 234 History of Native Americans Pre-contact to the Modern Age (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. A survey of Native American of North America from the pre-Columbian to the Contemporary era. The course emphasizes general education special requirements of intensive writing/critical thinking, and ethnic/race/gender, and historical awareness (IW/CI, ERG, and HA).
HST 245 Selected Topics in History      (1-3)  
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. Covers selected topics in history. Specific topics are stated when the course is scheduled. May be repeated with a change of content.

HST 246 Human Heritage I   (3-4)  
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. This two-term course offers a study of Western, Chinese, and American Indian intellectual traditions. The course is designed to help students understand how cultural traditions influence ways of looking at the world and how studying cultures other than one's own expands and challenges one's frame of reference. The course emphasizes intellectual, artistic, political, scientific, religious, and economic aspects of the three cultures from selected periods in history. The course emphasizes general education special requirements of intensive writing/critical thinking, and ethnic/race/gender, and historical awareness (IW/CI, ERG, and HA).

HST 247 Human Heritage II      (3-4)  
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. A continuation of Human Heritage I. The course emphasizes general education special requirements of intensive writing/critical thinking, and ethnic/race/gender, and historical awareness (IW/CI, ERG, and HA).

Humanities (HUM)  

HUM 105 Introduction to Logic and Critical Thinking   (3)  
Prerequisites: ENG 100B or placement test and FST 131, or the reading proficiency requirement. Introduction to basic principles of logical analysis. Students present and evaluate arguments in ordinary language using critical thinking and appropriate standards of evidence.

HUM 131 Music Appreciation   (3)  
No prior music experience necessary. Designed to develop listening skills for increased listening pleasure. Utilizes community resources for live performances as well as audio-visual material. The course emphasizes the general education special requirement of ethnic/race/gender awareness (ERG).

HUM 151 Perspectives on the Southwest      (3)  
Prerequisite: ENG 101 or concurrent enrollment. An interdisciplinary study of the land and the cultural and artistic expressions of three ethnic groups in the Southwest. Emphasizes art; also includes history, geology, geography, and archaeology. The course emphasizes the general education special requirements of intensive writing/critical thinking and ethnic/race/gender awareness (IW/CI and ERG).

HUM 152 Film Appreciation   (3)  
A course in film history and the special qualities of film communication. Discusses the effects and technical aspects of film. Several American film genres are examined. Emphasizes the development of critical viewing abilities. Includes readings about film, film viewing, lectures, discussions, and a two-hour laboratory per week for film viewing.

HUM 221 Introduction to Philosophy   (3)  
Prerequisite: ENG 101 and FST 131. An introduction to major issues in philosophy. Readings and discussion of writings by major philosophers. The course emphasizes the general education special requirement of intensive writing/critical thinking (IW/CI).

HUM 250 The Arts and Society   (3)  
Prerequisite: ENG 101 or concurrent enrollment. A comparative study of humanity’s need for art and the attempts to create through the visual arts, literature, philosophy, music, and history. Designed to develop an appreciation for and understanding of European and modern American culture as artistic and creative expression. The student gains insight into the process of creating and understanding meaning through symbols of art.

Library (LIB)  

LIB 110 Introduction: Books and Libraries   (2)  
Prerequisite: FST 131 or instructor’s permission. An introduction to the college library collection and training in the techniques of locating information using library resources. One hour lecture and two hours laboratory. Requires an annotated bibliography for the final project. All labs held in an approved library.

Mathematics (MTH)  

MTH 011 Arithmetic   (3)  
Covers arithmetic operations with whole numbers, fractions, decimals, percent measurement conversions, area and volume, and basic algebraic manipulations. (IP grade applicable.)

MTH 051 Beginning Algebra   (3)  
Prerequisite: Placement test or minimum grade of "C" in MTH 011. An introduction to algebra concepts: integers, rational numbers, algebraic
expressions, linear equations, products, factors, algebraic fractions, quadratic equations, exponents, and radicals. (IP grade applicable.)

MTH 100 Intermediate Algebra (4)
Prerequisite: Placement test or minimum grade of "C" in MTH 051. The real number systems, arithmetic operations with integers, linear equations, word problems, formulas, exponents and radicals, polynomials, factoring, quadratic equations, rational expressions and graphing. (IP grade applicable.)

MTH 107 Math for Elementary School Teachers I (3)
Prerequisite: MTH 100 or equivalent. Covers set theory, Venn diagrams, natural numbers, integers, rational numbers, and real numbers. Presents an in-depth study of the real number system with all topics relating to elementary teaching. Pedagogy and assessment conform to the National Council of Teachers of Mathematics standards (1989). Students planning to enter the Diné Teacher Education Program must take MTH 180 and MTH 181 rather than MTH 107 and MTH 109.

MTH 109 Math for Elementary School Teachers II (3)
Prerequisite: MTH 100 or equivalent. Relates logic and reasoning in geometry, constructions, definitions, theorems, polygons, lines, angles, areas, and volumes to the teaching and content of the elementary grades. Pedagogy and assessment conform to the National Council of Teachers of Mathematics Curriculum and Evaluation Standards for School Mathematics (1989). Students planning to enter the Diné Teacher Education Program with Arizona State University must take MTH 180 and MTH 181 rather than MTH 107 and MTH 109.

MTH 110 College Algebra (3)
Prerequisite: Placement test or minimum grade of "C" in MTH 100 or instructor’s permission. Covers functions and their graphs, including linear, quadratic, polynomial, rational, exponential, and logarithmic functions. Also covers the algebraic concepts necessary for the study of these functions. Four lecture hours per week.

MTH 111 College Trigonometry (3)
Prerequisite: Minimum grade of "C" in MTH 110 or instructor’s permission. Definition of trigonometric functions, graphs, identities, inverse trigonometric functions, equations, applications, law of sines, and cosines. Two lecture hours and two workshop hours are required per week.

MTH 114 College Mathematics (3)
Prerequisite: Placement test or minimum grade of "C" in MTH 100 or instructor’s permission. Contemporary quantitative methods, especially descriptive statistics, elementary probability, statistical inference, linear and exponential models of growth and decay, and discrete models. Four lecture hours per week.

MTH 118 Finite Mathematics (3)
Prerequisite: Minimum grade of "C" in MTH 110 or instructor’s permission. Matrices and the solution of linear systems, inequalities, linear programming, permutations and combinations, discrete probability, and a brief introduction to descriptive statistics.

MTH 180 College Mathematics for Elementary School Teachers I (3)
Prerequisite: "C" grade or better in MTH 110 or MTH 114. Intuitive development of the arithmetic of real numbers beginning with counting numbers and progressing through integer and rational numbers as appropriate for students in grades K-8. Problem-solving techniques ranging from hands-on activities with manipulatives to algebraic methods are emphasized throughout.

MTH 181 College Mathematics for Elementary School Teachers II (3)
Prerequisite: "C" grade or better in MTH 110 or MTH 114. Intuitive development of geometry and measurement. Introduction to probability and statistics using arithmetic and algebraic methods.

MTH 190 Pre-Calculus (5)
Prerequisite: Minimum of grade of "C" in MTH 110 or instructor’s permission. Offers in-depth preparation for students in science, math, and engineering. Serves as a prerequisite for calculus. Covers algebraic and geometric properties of functions (polynomial, rational, exponential, logarithmic and trigonometric); sequences and series; methods of proof; the binomial theorem; topics in analytic geometry; matrices; polar coordinates; complex numbers; vectors; and an introduction to limits. Four hours lecture and three hours workshop per week.

MTH 191 Calculus I (5)
Prerequisite: Minimum grade of "C" in MTH 190 or instructor’s permission. Introduction to calculus with an emphasis on problem solving. Limits and continuity, differential and integral calculus of one variable, the fundamental theorem of calculus, with applications in business, Social and Behavioral Sciences, and the natural sciences. Four hours lecture and three hours workshop per week.
MTH 192 Calculus II (4)
Prerequisite: Minimum grade of "C" in MTH 191 or instructor’s permission. Techniques of integration, applications of integration, parametric equations, polar coordinates, sequences, and series. Four hours lecture and three hours workshop per week.

MTH 210 Discrete Math (3)
Prerequisite: MTH 110 or instructor’s permission. Set theory, combinatorics, probability, graphs theory, and Finite Geometry. Topics relevant to Computer Science majors.

MTH 213 Statistics (4)
Prerequisite: Minimum grade of "C" in MTH 110 or MTH 114 or instructor’s permission. Cross listed with PSY 213. Representation of data, measures of central tendency, standard deviation, sampling, the normal, chi-square, student’s T and F distributions, and regression and correlation. Basic concepts of experimental design and statistic analysis involved in quantitative research.

MTH 220 Calculus III (4)
Prerequisite: Minimum grade of "C" in MTH 192 or instructor’s permission. Vector analysis, differentiation and integral calculus of several variables with applications. Four hours lecture and three hours workshop per week.

MTH 221 Ordinary Differential Equations (3)
Prerequisite: Minimum grade of "C" in MTH 192 or instructor’s permission. First order differential equations, applications, higher order differential equations, numerical methods, with applications in physical, biological and Social and Behavioral Sciences.

MTH 225 Elementary Linear Algebra (3)
Prerequisites: MTH 110 or instructor’s permission. An introductory course for all sciences, engineering, and mathematics education majors. Topics include matrices, system of linear equations, determinants, vector spaces, linear transformations, and eigenvalues.

Navajo Language (NAV)

NAV 101 Navajo as a Second Language I (4)
For non-Navajo speakers. Aimed at mastery of pronunciation, identification of sounds, thought patterns, and vocabulary. Students learn simple Navajo conversation. An individual, one-hour conversational practice workshop is mandatory for each class session. The course emphasizes the general education special requirement of ethnic/race/gender awareness (ERG).

NAV 102 Navajo as a Second Language II (4)
Prerequisite: NAV 101. Mastery of simple sentences. Combination of simple sentences with more complex sentences. Enlarging of vocabulary through oral exercises. An individual, one-hour conversational practice workshop is mandatory for each class session. The course emphasizes the general education special requirement of ethnic/race/gender awareness (ERG).

NAV 201 Intermediate Navajo for Non-Native Speakers (4)
Prerequisite: NAV 102. Third-semester course for non-native speakers. Students review the material taught in NAV 101 and 102 and proceed to more advanced structures, situations, vocabulary, and functions. An individual, one-hour conversational practice workshop is mandatory for each class session.

NAV 202 Advanced Intermediate Navajo for Non-Native Speakers (4)
Prerequisite: NAV 201. Fourth-semester course for non-native speakers. Students review material from NAV 101, 102, and 201, and then proceed to more advanced structures, situations, functions and grammar. An individual, one-hour conversational practice workshop is mandatory for each class session.

NAV 211 Navajo Literacy for Speakers I (3)
For Navajo speakers. Designed to develop skills in reading and writing Navajo, as well as an understanding of the language and its sounds and structure. The course emphasizes the general education special requirement of ethnic/race/gender awareness (ERG).

NAV 212 Navajo Literacy and Grammar for Speakers II (3)
Prerequisite: NAV 211. For Navajo speakers. Develops additional skills in reading and writing Navajo. Emphasis on grammatical structure. The course emphasizes the general education special requirement of ethnic/race/gender awareness (ERG).

NAV 231 Medical Terminology of the Navajo (3)
Prerequisite: NAV 101 or NAV 211. Translation and use of medical terminology from English to Navajo and Navajo to English.

NAV 231 Medical Terminology of the Navajo (3)
Prerequisite: NAV 101 or NAV 211. Translation and use of medical terminology from English to Navajo and Navajo to English.

NAV 287 Navajo Transcription (3)
Prerequisite: NAV 212. Interpretation, translation, and transcription of raw materials gathered from interviews, ceremonies, speeches, storytelling, and other contexts. Stresses the development of vocabulary including specialized terminology and concepts.
NAV 289 Navajo Linguistics (3)
Prerequisite: NAV 212. Introductory linguistics course covering basic concepts in sociolinguistics, psycholinguistics, syntax, phonology and morphology. Navajo is used for concrete exemplification.

NAV 291 Advanced Navajo Public Speaking (3)
Prerequisite: NAV 212 or Instructor’s Permission. Students study videotaped presentations of twelve articulate Navajo speakers in genres of major oral performance. The presentations are analyzed in terms of style, theme, topic, structure, and effectiveness. Students are required to give oral presentations of various types culminating in a twenty minute public speech. Students must work from extensive notes in Navajo.

NAV 301 Navajo Descriptive and Narrative Writing (3)
Prerequisite: NAV 212. Students read and write descriptive and narrative texts in Navajo, complete weekly papers, and use word-processors to produce high-quality written products. One such text must be read over the radio.

NAV 350 Teaching Navajo to the Native Speaker (4)
Prerequisite: NAV 301. Addresses major issues in teaching Navajo literacy and Navajo language arts to native speakers of Navajo.

NAV 351 Teaching Navajo as a Second Language (4)
Prerequisite: NAV 301. Addresses major issues in the teaching/learning of second languages with specific emphasis on Navajo language as taught in the public schools.

NAV 401 Navajo Grammar and Applied Linguistics (3)
Prerequisite: NAV 289 and 301 or Instructor’s Permission. Analysis of the Navajo language using the descriptive terminology of Young and Morgan (1987).

NAV 478 The Athapaskan Roots of Navajo (3)
Prerequisite: NAV 401 and NAV 289. This course investigates the relationship between the Navajo Language and the other languages of the Athapaskan branch of the Na-Dene language family. It traces sound changes from Proto-Athapaskan to modern Navajo. Texts from other Apachean language and Athapaskan languages of the Pacific coast and farther North are examined to explore common roots, syntax, morphology, and even cultural elements.

Navajo and Indian Studies (NIS)

NIS 101 Navajo Pottery (3)
The origin of Navajo pottery and development of pottery wares as an extension of human tools. Projects involve making pottery, design, and glaze.

NIS 103 Navajo Basketry (3)
The origin, purposes, philosophy, and functions of Navajo baskets. Projects include making traditional designs, baskets, and water jugs.

NIS 105 Navajo Weaving I (3)
The origin, purposes, philosophy, and historical development of weaving from the Diné perspective. Rug weaving projects include traditional upright-loom weaving techniques and design.

NIS 107 Moccasin Making (3)
The origin, purposes, philosophy, and historical development of moccasins. Includes projects in making male and female moccasins.

NIS 108 Navajo Silversmithing I (3)
The origin and cultural development of silver jewelry. Basic skills in making tools, designing, forming, cutting, piercing and soldering.

NIS 111 Foundations of Navajo Culture (3)
An introduction to the basic values of Diné society, past and present, including the clan system, philosophy of duality, oral narratives, and symbolic interpretations. Instruction takes place in Navajo and English. The course emphasizes the general education special requirements of intensive writing/critical thinking, and ethnic/race/gender, and historical awareness (IW/CI, ERG, HA).

NIS 150 Introduction to Navajo Herbology (3)
Examines concepts fundamental to the Navajo use of herbs in environmental and ceremonial contexts. Instruction in Navajo and English. This course is offered only in the summer and fall semester.

NIS 205 Navajo Weaving II (3)
Development of design, skills, and creativity in weaving geometrical, pictorial, and double-woven rugs, including the comparative study of ancient and contemporary weaving.

NIS 208 Navajo Silversmithing II (3)
Prerequisite: NIS 108. Creative design, intermediate skills, and lapidary techniques in silversmithing, including the comparative study of Navajo and American Indian jewelry craftsmanship.
NIS 220 Navajo Oral History (3)
Prerequisite: NIS 111. Examines Diné oral history and cosmology with an emphasis on ceremonial practices and world creation narratives. May include a field trip to Dinétah or other historical sites. This course is offered only in the Fall semester.

NIS 221 Navajo History to Present (3)
Prerequisite: FST 131 and ENG 101 or instructor’s permission. Examines Diné history beginning with anthropological theories about prehistoric migrations to and acculturation in the Southwest followed by the later European-contact period and ending with current events. Includes an overview of key aboriginal land settlements, federal Indian laws, court decisions, and other Indian policies within the context of Diné tribal, inter-tribal, city, county, state, and federal government relations. The course emphasizes the general education special requirements of intensive writing/critical thinking, and ethnic/race/gender, and historical awareness (IW/CI, ERG, and HA).

NIS 222 Contemporary Indian Affairs and Tribal Government (3)
Prerequisite: FST 131, ENG 101, and NIS 221 or instructor’s permission. An overview of federal policies and programs since 1776 that have dealt with U.S. Indian Nations. Examines relationships between tribes and national, regional, and local governments, as well as the rise of a new, collective, national, and political Native American identity.

NIS 225 Indians of the United States and North America (3)
Prerequisite: ENG 101 or concurrent enrollment, or instructor’s permission. Cross listed with ANT 225. A survey of indigenous groups of the U.S. and Canada, with an emphasis on changing economic and political forces that influence various tribal groups. Discussion of origins, customs, language, arts, and habitats.

NIS 226 Navajo Tribal Government (3)
Prerequisite: FST 131, ENG 101, and NIS 221 or instructor’s permission. Cross listed with POS 226. The development of Navajo tribal government concentrating on its evolution since the 1920's. Examines the legal and political basis of tribal government, the structure and functions of tribal powers and services, fiscal changes, and administrative growth. Includes political relations, developments, and transitions related to state and federal government. Highlights major contributions of tribal chairmen and presidents. The course emphasizes the general education special requirements of intensive writing/critical thinking, and ethnic/race/gender, and historical awareness (IW/CI, ERG, and HA).

NIS 261 Navajo Oral Tradition and Styles (3)
Prerequisite: NIS 111 or instructor’s permission. Examines the philosophy and thinking of traditional elders in Navajo society by listening to and analyzing oral styles including storytelling, oratory, prayers, and lectures. Instruction in English and Navajo.

NIS 290 Native American Symposium (3)
Selected topics in contemporary Native American affairs.

NIS 292 Native American Holistic Expression (3)
Examines the basic principles of Native American spiritual life, common philosophies and values, cycles of life and contemporary ritualistic practices throughout the North American continent.

NIS 293 Native American Music for Teachers (3)
Cross-listed with EDU 293. Focuses on music, dance repertoire, and teaching methods for use in the classroom. Discusses traditional tribal styles, instruments, and social/ceremonial contexts with special emphasis on the Navajo Nation and other Southwestern tribes.

NIS 311 Introduction to Navajo Wholistic Healing (3)
Prerequisite: NIS 111. A general discussion of major Navajo ceremonies of the summer and winter seasons according to Navajo teachings. Examines the development and organization of ceremonies with emphasis on their purpose, significance, and procedures. Includes study of ceremonies from the Hózhóóji (Blessing Ways) and Naayééjí (Protection Ways). May include field experiences to local traditional healing ceremonies.

NIS 371 Navajo Philosophy (3)
Prerequisite: NIS 111. An advanced analysis of the inter-relationship of male and female principles and the manifestation of dual forces. The course takes a well-integrated look at Diné philosophical thought on metaphysics, epistemology, aesthetics, ethics, religion, and traditional social structure. The course emphasizes the general education special requirements of intensive writing/critical thinking, and ethnic/race/gender, and historical awareness (IW/CI, ERG, and HA).
Physical Education and Recreation (PER)

PER 113, 115, 119 Team Sports (1)
Students on the Diné College (113) Cross-Country, (115) Marathon or (119) Archery team may enroll in the courses with the Coach/Instructor’s permission. Students sign a course contract and are responsible for the rules and regulations of their sport. Students who quit or are dropped from the team are dropped from this course unless other arrangements are made with the instructor.

PER 120 Strength Training (1)
Introductory activities in strength training, individualized programming, safety, fitness, benefits, and exercise selection. One hour lab required.

PER 121 Advanced Strength Training (1)
Prerequisite: PER 120 or instructor’s permission. Advanced activities in advanced strength training, individualized programming, and exercise selection. One hour lab required.

PER 122 Fitness for Life (2)
An individualized approach to physical fitness, designing personal fitness programs for cardiovascular development, strength, flexibility, weight control, and nutrition. Fitness testing administered at the beginning and end of class.

PER 123 Archery (1)
Introductory activities in techniques of shooting. Includes the history of archery, equipment, safety, and individualized practice. One hour lab required.

PER 125 Basketball (1)
Introductory activities in basketball skills, rules, and offensive and defensive strategies. Includes demonstrations, drills, and scrimmages. One hour lab required.

PER 130 Physical Education Activity (1)
Introductory activity class that overviews a variety of physical activities and sports. One hour lab required.

PER 132 Jogging (1)
Introductory activities in proper running techniques, program design, pacing, form, interval training, and distance running. One hour lab required.

PER 133 Beginning Karate (1)
An introductory course. Speed of movement is not important at all in beginning karate; however, the knowledge of how and why is important. Every student is expected to advance at his or her own rate through practice. One hour lab required.

PER 135 Recreational Games (1)
Introductory activities in a variety of games, sports, and leisure activities. Activities include but are not limited to archery, bowling, basketball, badminton, billiards, jogging, softball, tennis, volleyball, strength training, table tennis, and traditional Navajo games. One hour lab required.

PER 138 Volleyball (1)
Introductory activities in basic skills, rules, and offensive and defensive strategies in volleyball.

PER 141 Aerobics I (1)
Introductory activities in low and high impact exercises, training zones, body image, and exercise selection. One hour lab required.

PER 143 Country and Western Dancing (1)
Introductory activities in country and western dancing, proper body movement, posture, rhythm and beats, and music selection. One hour lab required.

PER 145 Beginning Swimming (1)
This course is for non-swimming students to gain proficiency in swimming. Students learn to breathe correctly, float, swim in deep water, overcome fear, and swim across a pool. Instruction covers the crawl and backstroke. One hour lab required.

PER 146 Intermediate Swimming (1)
This course is open to students at various proficiency levels in swimming. Instruction focuses on intermediate swimming, endurance, and body mechanics that facilitate efficient performance and increased appreciation of swimming. Instruction covers perfection of basic strokes and physical fitness. One hour lab required.

PER 148 Outdoor Recreation (1)
Introductory activities, knowledge, and skills in hiking, camping, backpacking, mountaineering, canoeing, fishing, cross country skiing, and traditional Navajo outdoor activities. One hour lab required.

PER 150 Sports Officiating (2)
Rules and introductory methods in officiating for elementary, middle school, high school, and collegiate sports programs.

Physics (PHY)

PHY 101 Survey of Physics (4)
Prerequisite: ENG 100B, FST 131, and MTH 051 or instructor’s permission. A conceptual introduction to physics utilizing minimal mathematics. Designed for
non-science majors and students with no prior physics background. Three hours lecture and three hours laboratory per week. Fulfills the General Education requirement for a laboratory science course.

PHY 110 Algebra based Physics I (4)
Prerequisite: MTH 110 or concurrent enrollment or instructor’s permission. An algebra based introduction to physics sequence designed for science majors who do not require calculus based physics. Also suitable for liberal arts majors and general education students with no prior physics background; covers classical mechanics. Trigonometric requirement will be taught in the class. Three hours lecture and three hours laboratory per week.

PHY 111 Algebra based Physics II (4)
Prerequisite: PHY 110 or equivalent course. Second and final of an algebra based introduction to physics sequence designed for science majors who do not require calculus based physics. Also suitable for liberal arts majors and general education student with no prior physics background; covers optics, electricity and magnetism. Three hours lecture and three hours laboratory per week.

PHY 121 Calculus based Physics I (4)
Prerequisite: MTH 191 or instructor’s permission. First of three sequences of calculus-based courses designed for the science and engineering major with no prior physics background; covers classical mechanics. Three hours lecture and three hours laboratory per week.

PHY 131 Calculus based Physics II (4)
Prerequisite: PHY 121 and MTH 192 or concurrent enrollment or equivalent courses. Second of three sequences of calculus-based courses designed for the science and engineering major; covers electricity, magnetism and optics. Three hours lecture and three hours laboratory per week.

PHY 243 Calculus based Physics III (3)
Prerequisite: PHY 131 and MTH 220 or concurrent enrollment or equivalent courses. Third and final of a sequence of calculus-based courses designed for the science and engineering major; covers thermodynamics, atomic and nuclear physics. Three hours lecture per week.

Political Science (POS)

POS 111 Introduction to Political Science (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. Examines the principles, methods, topics, and concepts of political science in light of contemporary political events. Analyzes power, authority, and political philosophy in diverse contexts including tribal politics. Meets teacher certification requirements. The course emphasizes the general education special requirements of intensive writing/critical thinking and ethnic/race/gender awareness (IW/CI and ERG).

POS 170 American Government and Politics (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. Examines the origin of the U.S. Constitution as well as governmental structures, procedures, and politics at the federal, state, local, and tribal levels.

POS 181 Arizona Constitution and Government (1)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. Examines the Arizona State Constitution in terms of its historical roots, content, modifications, and interpretations. Also examines Arizona governmental structures, procedures, and politics at all levels including the Navajo tribal level. Meets Arizona teacher certification requirements.

POS 226 Navajo Tribal Government (3)
Prerequisite: FST 131, ENG 101 or NIS 221 or instructor’s permission. Cross listed with NIS 226. The development of Navajo tribal government concentrating on its evolution since the 1920’s. Examines the legal and political basis of tribal government, the structure and functions of tribal powers and services, fiscal changes, and administrative growth. Includes political relations, developments, and transitions related to state and federal government. Highlights major contributions of tribal chairmen and presidents. The course emphasizes the general education special requirements of intensive writing/critical thinking, and ethnic/race/gender, and historical awareness (IW/CI, ERG, and HA).

POS 271 U.S. Constitution and Politics (2)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. Examines the philosophical antecedents, historical development, and interpretations of the U.S. Constitution. Also examines federal governmental structures, procedures, and politics. Meets Arizona teacher certification requirements.

Psychology (PSY)

PSY 100A Ethics and Human Services (1)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. Covers ethics,
confidentiality, non-discrimination, responsibility, competency, legal and moral standards, client welfare, client relationships, and professionalism in the human services.

PSY 100B Client Processing  (1)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. Covers client processing, intake, interviewing, treatment planning skills, and assessment and evaluation.

PSY 111 Introduction to Psychology  (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. An introduction to the scientific study of individual behavior. Provides a broad overview of major approaches, concepts, topics, issues, methods, findings, contributors, and applications of psychological knowledge to everyday life. Covers biological influences on behavior, sensation, perception, learning, cognition, motivation, emotion, personality, human development, psychopathology, and psychotherapy. The course emphasizes the general education special requirements of intensive writing/critical thinking and ethnic/race/gender awareness (IW/CI and ERG).

PSY 212 Chemical Dependency  (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. This is an introductory course for examining basic issues in alcohol and drug abuse, treatment, and prevention. For paraprofessionals interested in expanding counseling and theoretical knowledge and skills.

PSY 213 Statistics  (4)
Prerequisite: Minimum grade of “C” in MTH 110 or MTH 114 or instructor’s permission. Cross listed with MTH 213. Representation of data, measures of central tendency, standard deviation sampling, the normal, chi-square, student’s T and F distributions, and regression and correlation. Basic concepts of experimental design and statistical analysis involved in quantitative research.

PSY 215 Personal and Social Adjustment  (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. An overview of basic psychological principles as they apply to coping with stress, interpersonal relationships, marriage, parenting, and working. Emphasis on learning to become a more competent and effective person. Course may carry one, two, or three credits.

PSY 220 Expressive Arts Therapy  (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. Provides an overview, experiential course for individuals in the counseling and behavioral health fields. Visual arts, music/sound, dance/movement, play therapy, psychodrama, and bioenergetics are examined as tools of therapy.

PSY 225 Group Dynamics  (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. Examines group dynamics, functions, change, and communication skills with emphasis on substance abuse and family contexts. Also covers social change, group processes, leadership, facilitation, and participation styles.

PSY 240 Human Growth and Development  (3)
Prerequisite: ENG 101 or concurrent enrollment, or instructor’s permission. An overview of the field of human growth and development from prenatal development and birth through later adulthood and aging. Topics include physiology, perception, language, cognition, personality, social and moral development, family, and cultural and social influences on development. This course emphasizes the general education special requirements of intensive writing/critical thinking and ethnic/race/gender awareness (IW/CI and ERG).

PSY 241 Abnormal Psychology  (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. Etiology, symptomatology, and classification of organic and functional behavior disorder, mental deficiencies, and other deviations. Treatment modalities overview will be examined.

PSY 242 Community Social Service Skills  (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. Cross listed with SWO 242. Examines casework, group skills, organization of communities, and family therapy. Emphasis on case management, crisis intervention, and treatment planning especially in substance abuse situations. Credit may be given for work in a community service setting (at the discretion of the instructor).

PSY 250 Social Psychology  (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. An overview of science-oriented approaches to the study of the impact of environment, particularly the social environment, on individual behavior. Considers individual behavior but emphasizes the relationship between individual and group behavior. The course emphasizes the general education special requirements of intensive writing/critical thinking and ethnic/race/gender awareness (IW/CI and ERG).
PSY 260 Drug Use and Abuse (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. An examination of current and historical patterns of alcohol and drug use, abuse, and control, including pharmacology and physiology of drugs. Use of PDR and DSM IV is presented. Emphasis on patterns of usage and programs for rehabilitation.

PSY 290 Methods of Research (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. An introduction to qualitative and quantitative methods used in the Social and Behavioral Sciences. Covers testable theories, evaluation of research hypotheses, operational definitions, measurement, design, data collection, analysis, and research report writing. Three hours lecture.

PSY 291 Introduction to Counseling (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. Cross listed with CHD 291. An overview of various approaches to and techniques in counseling.

PSY 292 Human Sexuality (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. A survey of the psychological aspects of human sexual behavior. Emphasis on cognitive, emotional, behavioral, and cultural factors that shape sexuality.

PSY 295 Field Experience I (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. Cross listed with CHD 295. Places students in community social and behavioral health agencies for a minimum of ten hours per week. Provides opportunities to develop knowledge, skills, and values in social work program.

PSY 296 Field Experience II (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. Cross listed with CHD 296. Continuation of PSY 295 with more advanced experiences and detailed reports required.

PSY 297 Case Presentation (1)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. Cross listed with CHD 297. Capstone case presentation that involves skills, interviewing, screening, treatment planning and management, ethics, confidentiality, non-discrimination, legal and moral standards, client welfare and relationships, professional relationships, termination of treatment, relapse prevention, and after care skills.

Public Health (PUH)

PUH 111 Introduction to Public Health (3)
This course introduces students to all aspects of the field of public health, focusing on health promotion and disease prevention goals designed to establish and maintain healthy communities. The 3 Core Functions and 10 Essential services of public health, as well as reading and lecture materials, are organized and presented within the contexts of Nitsăhákees, Nahat’á, Iná and Sihasin in the Diné Educational Philosophy. This course is intended to help students become both knowledgeable and culturally competent; as effective public health professionals in the Navajo Nation.

PUH 141 Nutrition for Health (3)
Prerequisite: MTH 011 and concurrent ENG 100B or instructor’s permission. General concepts of nutrition applied to food choices that support health; cultural, psychological and economic implications of food choices. Current concepts and controversies in human nutrition. Carbohydrate, protein, lipids, vitamins and minerals in nutrition; and the relation of nutrition to health throughout the life cycle.

PUH 191 Seminar in Public Health (3)
Introduces students to problems faced in health care delivery. Topics include emergency service, the delivery and referral systems, and challenges, including alcoholism, drugs, and mental health.

PUH 200 Principles of Health Education (3)
Prerequisites: Completion of FST 131 or reading proficiency requirement. PUH 111 and HEE 110 or concurrent enrollment. This course introduces students to the field of Health Education. It explores social and behavioral theories, health education, and determinants of health behavior of individuals and groups. It requires a final project. Emphasis is on methods and issues relevant to the Navajo Nation. Guest speakers involved in health education on the Navajo Nation make presentations. Topics in the course will facilitate application of the principles of SNBH.

PUH 201 Principles of Environmental Public Health (3)
Prerequisites: Completion of FST 131 or reading proficiency requirement. Completion of or concurrent enrollment in PUH 111. This course examines the field of Environmental Public Health. It explores environmental health professionals' roles in ensuring safe and healthy environments including proper sanitation, food safety, occupational safety, and air and water quality. Explores federal, state, local, and
tribal entities involved in environmental public health activities. Navajo-specific examples are examined. Navajo cultural beliefs related to nature and the environment provide the foundation on which the course is taught.

PUH 202 Uranium and Environmental Health (3)
Prerequisites: Completion of FST 131 or reading proficiency requirement. This course examines the impacts of uranium and the uranium mining industry on the people and land of the Navajo Nation. Primary emphasis is on environmental public health effects and efforts to remediate them. Provides comprehensive information on all aspects of uranium, the uranium industry, and the health effects of exposure to uranium.

PUH 241 Human Nutrition (3)
Prerequisite: CHM 130. (CHM 230 recommended.) Principles of human nutrition relative to health. Emphasis on nutrients how they affect the human body. Explores structure and function, digestion and absorption, and the metabolism of carbohydrates, lipids, proteins, minerals, and vitamins. Also examines energy, weight-management, nutritional requirements of different age groups, U.S. dietary trends, and guidelines for good nutrition and health.

PUH 270 Community Health Assessment and Planning (3)
Prerequisite: Completion of ENG 100B and PUH 111. First of two courses that examine assessment, planning, implementation, and evaluation in public health practice. The course focuses on assessment and planning as carried out in epidemiology, environmental public health, health education and promotion, and health services administration. It explores Navajo ways of knowing, defining, and thinking about health problems (Nitsáhákees) and the process of planning (Nahat’á) health intervention programs.

PUH 275 Health Services and Policy (3)
Prerequisite: Completion of PUH 111, ENG 101 or concurrent enrollment. Introduces health services administration and the role of policy development in public health. The course surveys national, state, local, and Navajo Nation health services, focusing on how they are administered. Relates U.S. public health services to those on the Navajo Nation and other tribal communities. The course is taught according to Diné Educational Philosophy (primarily in the realm of Iiná). Encourages students to approach each topic following the principles of SNBH.

PUH 280 Implementation and Evaluation of Public Health Interventions (3)
Prerequisite: Completion of PUH 111 and PUH 101. Second of two courses that examine assessment, planning, implementation, and evaluation in public health. The course focuses on implementation and evaluation and explores them as carried out in epidemiology, environmental health, health education and promotion, and health services administration. It is taught according to Diné Educational Philosophy (primarily in the realm of Siihasin). Encourages students to approach each topic following the principles of SNBH.

PUH 290 Public Health Research Methods (4)
Prerequisite: Knowledge of basic mathematical concepts (MTH 100), biology (BIO 100 or above), and some computer literacy skills. ENG 101 and a Social and Behavioral Sciences course are recommended. Covers basic concepts in public health, health promotion and disease prevention, and cultural aspects of disease prevention. Qualitative and quantitative research is covered, including hypothesis development, research design, development of research protocols, analysis using computer software packages, and presentation of results.

PUH 295 Public Health Sciences (3)
Prerequisite: MTH 110 or MTH 118 and PUH 111. Introduces epidemiology and biostatistics. Allows students to identify relevant and appropriate data and information sources. Explores relationships of risk factors and disease outcomes, with attention to the health priorities of the Navajo Nation. Introduces epidemiological research designs, statistics, and ways in which they influence public health decision-making.

Sociology (SOC)

SOC 111 Introduction to Sociology (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. A general introduction to sociological perspectives. Discussions of social institutions, class, power, conflict, change, culture, and socialization. The course emphasizes the general education special requirements of intensive writing/critical thinking and ethnic/race/gender awareness (IW/CI and ERG).

SOC 201 Racial and Ethnic Relations (3)
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. Examines minority and dominant group relations in the U.S.
SOC 210 Deviant Behavior (3)  
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. Examines behavior not accepted or approved in the society in which it occurs. Considers methods by which deviant behavior is studied, as well as theories of deviancy offered by sociologists, anthropologists, and psychologists. The course may focus on Navajo drinking behavior in its normative and deviant forms. It emphasizes the general education special requirements of intensive writing/critical thinking and ethnic/race/gender awareness (IW/CI and ERG).

SOC 215 The Native American in American Society (3)  
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. A general review of current living conditions, roles, statuses, and images of American Indians. Analyzes social and cultural change and conflict. Examines the growth of urban indigenous groups and their adjustments to urbanization, as well as the social, economic and political achievements of the Southwestern Indians. The course emphasizes the general education special requirements of intensive writing/critical thinking and ethnic/race/gender awareness (IW/CI and ERG).

SOC 217 Marriage and Family in a Changing Society (3)  
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. Examines marital relationships and social change. The course emphasizes the general education special requirements of intensive writing/critical thinking and ethnic/race/gender awareness (IW/CI and ERG).

SOC 220 Criminology (3)  
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. Examination of crime, theories of criminal development, types of offenders, crime statistics, and incarcerated penology. The course emphasizes the general education special requirements of intensive writing/critical thinking and ethnic/race/gender awareness (IW/CI and ERG).

SOC 275 Social Stratification (3)  
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. Examination of the unequal distribution of power, resources, income, and life chances in society. The courses analyzes economic and social classes, racism, ethnic stratification, colonialism within the U.S., gender stratification, and the changing position of women in society. It reviews the effects of poverty on individuals and communities. The course emphasizes the general education special requirements of intensive writing/critical thinking and ethnic/race/gender awareness (IW/CI and ERG).

Social Science (SSC)  

SSC 100 General Social Science (3)  
Introduction to sociology, anthropology, and geography. Includes material from political science, economics and psychology. Emphasizes concepts and terms common to study of human societies. Emphasizes fundamental academic skills.

Social Work (SWO)  

SWO 111 Social Work as a Vocation (1)  
Examines ego psychology as it is applied in social work.

SWO 211 Introduction to Social Work (3)  
Continuation of SWO 111. Offers an introduction to values, ethics, skills, and knowledge pertaining to social work. Emphasis is on social systems theory.

SWO 221 Introduction to Social Welfare (3)  
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. A survey of the field of social welfare. Describes how social welfare evolved as an institution. Covers social welfare needs, programs, policies, and issues.

SWO 242 Community Social Service Skills (3)  
Prerequisite: ENG 101 or concurrent enrollment or instructor’s permission. Cross listed with CHD 242 and PSY 242. Examines casework, group skills, organization of communities, and family therapy. Emphasis on case management, crisis intervention, and treatment planning especially in substance abuse situations. Credit may be given for work in a community service setting (at the discretion of the instructor).
SWO 243 Community Social Services and Culture (3)  
Examines the interplay of cultural factors and social services. Pertinent anthropological and social work concepts are introduced. The course is the capstone class of the professional social work track. Contemporary American Indian (and more specifically Navajo) social problems, such as suicide, homicide, alcoholism, and family violence, are explored. Traditional Diné philosophical tenets are applied as intervention strategies.

SWO 250 Client Processing (3)  
This course examines the mandates, methods of operation, routines, goals, objectives, and technologies of human service organizations. Skills for direct interactions are studied.

SWO 295 Field Experience I (3)  
Student is placed in community social service agencies for practical social work experience for a minimum of ten hours per week, offering opportunities to apply skills and to operationalize social knowledge and values in social work.

SWO 296 Field Experience II (3)  
A continuation of SWO 295 with more advanced experiential applications.
PERSONNEL

FACULTY

Emmanuel K. Agbolosoo, Social & Behavioral Sciences
Ph.D., University of Arizona
M.A., Pennsylvania State University
B.S., University of Ghana

Wilson Aronilth Jr., Center for Diné Studies
L.L.D., Navajo Community College

Martha Austin-Garrison, Center for Diné Studies
M.A., Arizona State University
B.A., University of Arizona

Benjamin Barney, Center for Diné Teacher Education
M.A., University of New Mexico
B.A., St. Johns College
B.S., Northern Arizona University

Mark Bauer, Math, Science & Technology

B.A., Houghton College

Gene Vecenti, Director of Project Sii Hasin  
M.Ed., Northern Arizona University  
B.A., Fort Lewis College  
A.A., Diné College

Harry Walters, Director, Museum  
B.A., Goddard College

Robert Yazzie, Director of Diné Policy Institute  
J.D. University of New Mexico  
B.A., Oberlin College

“\textit{We feel Diné College is the best place for us to start our education because it is close to home and we still have much to learn about our culture and traditions. Our family, our grandparents, and language are here. These are things we wouldn't be able to have at a school off the reservation.}” (2005)

Farrah and Tara Deschine
