SEMESTER GOALS

First-Time Freshman Students,

I will be your academic advisor your first two semesters in college. I look forward in our collaboration to bring learning to life. The future generations and your community depend on your intelligence, are you ready? Yes, no, or maybe I am here to help you begin gathering tools that will prepare you for the semester.

Responsibilities as a New Student

My expectation from you is simple, identify what motivates your spirit, apply it to your mind each day to find enjoyment in your learning. Since time is ticking, let's use each minute to self-identify, explore and work hard to validate our place and purpose in life. If you have questions don't hesitate to ask for help, communication is key in building a healthier Dine' Nation.
