

PHIS' Career Experience (ACE) Program aims to attract the best and brightest college talent into various disciplines within APHIS. Students who intern with APHIS will be hired as part of a cohort. This cohort will support your development and offer you various engagement and development opportunities throughout your experience. These can include group assignments, learning events, meetings, webinars, or other activities designed to enhance your professional growth and skill levels throughout the duration of the program. A few things to keep in mind you must:

- Have completed at least 60 credits (This is a qualifier for the GS-4 level.)
- Work at least 16 hours per week during the school year (The exact schedule is negotiable depending on the students academic schedule.)

The search for ACE interns will pull from many disciplines to support scientific, administrative, and other professional careers. The official announcement will be posted on [USAJobs.gov](https://www.usajobs.gov) in the next few days and will contain more specifics. Interested students should visit [USAJobs.gov](https://www.usajobs.gov) and create their profile today, and then set up a search for APHIS Pathways opportunities. Also, stay tuned for more details and the upcoming announcement.

For tips on creating a USAJobs profile, check out this article: [USAJOBS Help Center | How to create a profile](#). To set up an APHIS search and automatically receive internship and employment postings, see [USAJOBS Help Center | How to search by keyword](#).
