

The Florida WS Program is recruiting for a biologist level position located at Jacksonville Naval Air Station (NAS Jax). Naval Air Station Jacksonville is one of the Navy's finest and fastest growing installations and is the recipient of the 2012 Presidential Excellence Award and 2013 Commander, Navy Installations Command Excellence Award. It the largest Navy base in the Southeast Region and third in the nation. As a master air and industrial base, Naval Air Station Jacksonville supports U.S. and allied forces specializing in anti-submarine warfare and training of the best aviators in the world.

The biologist would work directly with a technician at NAS Jax as well as a technician at neighboring Mayport. Naval Station Mayport is one of three major Navy installations in the Jacksonville area. Mayport is home to a busy seaport as well as an air facility. The mission of NS Mayport is to sustain and enhance warfighter readiness. There is also an outlying training facility, Whitehouse airfield. There is a variation in wildlife species between the locations which includes, but not limited to, feral swine, white-tailed deer, coyotes, Canada geese, various gull species, ospreys and many more, make this position both exciting and challenging.

If you think you may be interested in this great opportunity, please email me. I look forward to hearing from you.

Thanks,
Cailey
