

Intermountain Doctoral Education to Advance Students (IDEAS) in Neuroscience

A New Post Baccalaureate Program at the University of Utah

ABOUT IDEAS IN NEUROSCIENCE

Intermountain Doctoral Education to Advance Students (IDEAS) in Neuroscience is a 2 year, NIH funded post baccalaureate program at the University of Utah. This is a training program for recent college graduates from underrepresented backgrounds who are interested in applying to PhD programs in the neurosciences.

This program will include mentored laboratory research, graduate level courses, professional development, and a holistic, culturally competent mentored experience. Students will also attend scientific conferences and have opportunities to present their research. An essential part of the IDEAS curricula is inclusive mentoring, providing career-long scientific, personal, and cultural support.

KEY ACTIVITIES

Graduate Coursework

Community Building

Mentored Independent Research

Professional Development

Graduate Program Application Prep

ABOUT THE POST BACC PROGRAM

Who Can Apply?

1

IDEAS in Neuroscience will recruit four students from diverse backgrounds, with a specific focus on students from Intermountain West institutions that serve Hispanic/Latino and Native American communities, and Historically Black Colleges and Universities (HBCUs).

What Are the Requirements?

2

- A passion for neuroscience; prior lab experience not required
- BA or BS in a STEM field, awarded by June 2023 from an institution with limited/no access to research programs
- Interest in pursuing a research based PhD
- Letters of recommendation and application package

What is the Compensation?

3

- \$35,000/yr for 2 years plus insurance
- Annual travel allowance to attend a scientific conference
