15	In an exit survey, graduating students are asked to rate how well they believe the program prepared them to achieve specific learning outcomes. For example, they might respond to questions such as, "How confident do you feel in applying critical thinking skills learned in the program?" or "How effective was the program in helping you develop communication skills?" While these responses provide valuable insights into students' perceptions, they do not directly measure their actual learning or skills.	12/18/2024 2:17 PM

## Q7 Do you have any other comments, questions, or concerns?

Answered: 17    Skipped: 6

#	RESPONSES	DATE
1	--How can we make the assessment process more inclusive and less off-putting to some faculty? --How do we address data collection in Canvas for courses that are part of multiple programs (such as Gen Ed and BFA)?	12/19/2024 9:32 AM
2	Faculty in our school are still confused about who is supposed to do what outside of collecting artifacts	12/19/2024 7:10 AM
3	I just would like more time actually doing the assessment collection ahead of the presentations, as the presentations spend more time presenting and little time on assessment. Thus, an assessment day defeats the purpose and simply becomes a presentation day(s).	12/18/2024 4:17 PM
4	None	12/18/2024 4:05 PM
5	Comments on Artifact Collection and Assessment Processes Several concerns regarding the discussed approach to artifact collection and assessment: Relevance of Artifacts in the Age of AI: Many proposed artifacts, such as student writing projects, may become obsolete as students increasingly use AI tools. Without safeguards, assessments will measure AI utilization rather than student learning or growth. This necessitates a shift toward artifact types that accurately reflect student competencies, independent of AI influence. Faculty Workload and Data Efficiency: The sheer volume of classes being used as sources for program artifacts is overwhelming and counterproductive. Assessments should focus on fewer, strategically chosen artifacts to provide clear, progressive insights into student outcomes. Additionally, faculty are already overburdened, and adding assessment responsibilities exacerbates this issue. Need for Independent Review: To ensure objectivity and alleviate faculty concerns about assessments being used punitively of their teaching, there should be external and independent reviews of artifacts, data, and conclusions. Such reviews could enhance transparency and credibility while addressing existing fears constructively. Faculty Inclusion in Decision-Making: Faculty, especially those involved in teaching the classes that will be used for artifacts, must have a voice in determining what artifacts and metrics are assessed. Excluding faculty, as seen in the master's degree program, undermines the relevance and buy-in needed for effective assessment. Rigorous Assessment for Master's Degree Programs: The current master's degree assessment process requires significant improvement. Allowing unqualified students to graduate damages both the program's reputation and the students' future prospects. Master's defenses should be externally evaluated with rigorous standards to ensure students are genuinely prepared for advanced academic or professional endeavors.	12/18/2024 4:04 PM
6	Respectfully, a quiz for faculty seems inappropriate - please do not consider my answers,answers; I simply couldn't submit the survey without answers. There are things to ask to improve the productivity of the exercise to benefit all - this isn't asked in this survey. Such as, what portions of the exercise could be improved and why? What could be added or deleted to improve the productivity of the sessions? Etc. It was great to see colleagues and talk about our programs. Much thanks for all your effort!	12/18/2024 3:58 PM
7	This was a practical example of an effective professional development opportunity - it was great to hear what other departments are doing.	12/18/2024 3:49 PM
8	Great couple days. Appreciated our colleagues sharing their progress and creative solutions. THANKS TO JERAD FOR ALL THE HARD WORK.	12/18/2024 3:47 PM
9	I think we need to define our course objectives clearly, completely and unambiguously in a syllabus. This helps in developing program assessments painlessly.	12/18/2024 3:13 PM
10	Faculty (all attendees) need to conduct themselves respectfully during the sessions - no talking among themselves or otherwise interrupting the speaker. Presentations need to have a time limit that is announced before the meeting/conference. Presenters need to speak slower, and more clearly with a clear presentation structure with Overview, Detail & Explanations,	12/18/2024 3:08 PM
